## LỜI NÓI ĐẦU

Trong đời chúng ta ai cũng phải trải qua những lần thi cử. Trong thi cử khó tránh khỏi hiện tượng ngẫu nhiên, may rủi.

Nhưng chúng tôi thiết nghĩ thất bại trong mỗi kỳ thi đều có nguyên nhân của nó. Có thể lúc vào phòng thi chúng ta thiếu tự tin? Có thể trong quá trình chuẩn bị chúng ta còn có chỗ nào đó chưa kỹ lưỡng? Có thể chúng ta chuẩn bị theo kiểu đóng tù lệch? ... Lý do có thể còn rất nhiều, nhưng việc thành hay bại chủ yếu do bản thân chúng ta quyết định. Nếu chuẩn bị chu đáo và có quyết tâm vượt khó trong từng bước ngoặt của cuộc đời mình, nhất định chúng ta sẽ đạt được những điều mong muốn.

Với mong muốn giúp các em đạt ước mơ ngồi trong giảng đường đại học, chúng tôi đã mạnh dạn biên soạn cuốn “Ôn luyện tiếng Anh”. Chúng tôi hy vọng với phần lý thuyết ngắn gọn và các dạng bài tập điển hình, đa dạng các em sẽ có trong tay một cuốn cẩm nang giúp các em thành công trong các kỳ thi tiếng Anh.

Chúc các em may mắn và thành công.

## **CẤU TẠO SÁCH**

Cuốn sách này được biên soạn nhằm giúp các em học sinh tìm hiểu vào các trường Đại học chuyên tiếng Anh hoặc các trường có yêu cầu học sinh phải thi tuyển môn tiếng Anh.

Sách giúp các em làm quen với các dạng bài thi tiếng Anh phổ thông nhất hiện nay và chuẩn bị cho các em đầy đủ các kiến thức và các kỹ năng cần thiết, giúp các em có thể làm được các loại bài kiểm tra tiếng Anh khác nhau, khi thi vào các trường đại học. Sách không những có thể sử dụng như là một tài liệu dùng để tự luyện thi mà còn có thể là một tài liệu tham khảo để các giáo viên PTT luyện thi tốt nghiệp và thi đại học cho học sinh.

Sách gồm có một số phần chính như sau :

### **Phần một**

#### **NHẬN XÉT CHUNG VỀ CÁC LOẠI HÌNH BÀI THI VÀO ĐẠI HỌC VÀ HƯỚNG DẪN CÁCH GIẢI**

Ở phần này chúng tôi muốn cung cấp cho học sinh một cái nhìn tổng thể về các dạng bài thi tiếng Anh phổ thông nhất và các trường đại học hiện nay. Trên cơ sở đó giúp cho các thí sinh biết được mình phải chuẩn bị những gì nếu muốn đạt kết quả cao trong các kỳ thi tuyển sinh.

Dựa trên kinh nghiệm giảng dạy lâu năm trong trường đại học chúng tôi muốn giúp các em một số mẹo để giải bài thi một cách nhanh nhạy và chính xác. Mặt khác giúp các em nhanh chóng hình thành các kỹ năng làm bài thi và nắm vững được những kiến thức cơ bản để có thể xử lý các loại bài tập khác nhau theo yêu cầu của từng trường.

## **Phần hai**

### **CÁC DẠNG BÀI TẬP**

Trên cơ sở nhận xét về nội dung và phương pháp kiểm tra, chúng tôi đã soạn ra một loạt hệ thống bài tập bổ trợ giúp cho các em có cơ sở luyện tập để có kiến thức và kỹ năng làm bài tốt trong quá trình luyện thi và thi. Các bài tập được chọn lọc cẩn thận và rất đa dạng tạo điều kiện cho học sinh có điều kiện tiếp xúc với các hiện tượng ngữ pháp khác nhau và các hệ thống chủ điểm phong phú.

## **Phần ba**

### **TÓM TẮT CÁC HIỆN TƯỢNG NGỮ PHÁP CƠ BẢN**

Để hiểu một cách sâu sắc hệ thống ngữ pháp tiếng Anh, đòi hỏi phải mất nhiều thời giờ và công sức tìm tòi, học hỏi mà với học sinh phổ thông, việc phân bổ thời gian cho bộ môn này thường bị hạn chế rất nhiều. Vì vậy với cuốn sách này, chúng tôi muốn giới thiệu một cách ngắn gọn những hiện tượng ngữ pháp cơ bản, điển hình thường hay xuất hiện trong đề thi vào các trường đại học giúp các em dễ ghi nhớ trong quá trình ôn thi. Phần tóm tắt ngữ pháp đều có ví dụ minh họa và những ghi chú cần thiết. Nếu trong quá trình làm các bài tập ôn luyện các em gặp khó khăn, các em có thể quay trở lại phần tóm tắt ngữ pháp để kiểm tra lại phần mình còn chưa nắm vững.

## **Phần bốn**

### **MỘT SỐ BÀI THI MẪU**

Trong phần này các em sẽ được làm quen với một số đề thi vào các trường đại học ở phía Bắc. Các đề thi này mới được ra trong thời gian gần đây. Mặc dù đã có những quy định thống nhất cho việc ra đề thi môn tiếng Anh cho các trường đại học của Bộ giáo dục và đào tạo, nhưng các trường đại học khác nhau đều ra các bài thi mang sắc thái riêng của mình để chọn các thí sinh phù hợp với yêu cầu đào tạo của từng trường. Chúng tôi muốn giới thiệu phần này để các em có điều kiện định hướng cho quá trình ôn tập của mình khi chọn các trường để dự thi tuyển.

## HƯỚNG DẪN SỬ DỤNG

**Đối với giáo viên :** Khi luyện thi cho học sinh, giáo viên có thể sử dụng từng phần trong sách để ra các bài tập cho học sinh nhưng khi học sinh sắp đến thời gian thi, giáo viên nên chọn từng phần bài tập một số phần nhất định để tạo ra một loạt câu để thi có thời gian làm bài là 180 phút, sau đó cho học sinh làm để các em quen với một bài thi tổng hợp và biết cách phân phối thời gian làm bài thi.

**Đối với học sinh :** Trong khi sử dụng sách để ôn tập và luyện thi, các em có thể làm từng phần bài tập riêng lẻ, sau đó kiểm tra lại kết quả ở phần đáp án. Trong khi làm bài tuyệt đối không nên giở phần đáp án để xem câu trả lời. Nếu các em cảm thấy phần ngữ pháp chưa chắc chắn thì nên giở sang phần tóm tắt ngữ pháp để ôn tập lại trước khi làm bài tập.

## Phần một

# NHẬN XÉT CHUNG VỀ CÁC LOẠI HÌNH BÀI THI TIẾNG ANH VÀO ĐẠI HỌC VÀ HƯỚNG DẪN CÁCH GIẢI

Khác với loại bài thi của nước ngoài, các bài thi tiếng Anh vào các trường đại học của Việt Nam hiện nay không có phần kiểm tra kỹ năng nghe và nói, mặc dù đây là hai kỹ năng rất quan trọng trong khi học một sinh ngữ. Các bài kiểm tra tiếng Anh vào các trường đại học ở Việt Nam chủ yếu nhằm kiểm tra, đánh giá khả năng đọc hiểu, viết và kiến thức ngữ pháp chung của học sinh qua các phần sau :

### A. Ngữ pháp

Đây là một phần rất quan trọng trong đề thi ; điều này có thể thấy rất rõ khi chúng ta nhìn vào các đề thi đã được ra từ trước đến nay. Phần này bao gồm nhiều loại bài tập khác nhau và có tổng số điểm khá lớn. Một trong những nguyên nhân khiến cho phần này được chú trọng như vậy trong các bài thi kiểm tra hiện nay là do sự thay đổi chậm trễ trong quan niệm về việc kiểm tra đánh giá, mặt khác việc ra bài kiểm tra theo kiểu này dễ dàng hơn cho việc ra đề thi và chấm thi. Phần kiểm tra ngữ pháp này rất dễ nếu các em nắm chắc được các phần ngữ pháp đã được học và làm quen với các dạng bài tập liên quan đến các phần đó, trái lại nó sẽ trở thành rất khó nếu phần lý thuyết và bài tập chúng ta nắm lơ mờ. Qua nghiên cứu các loại bài thi tiếng Anh vào đại học trong nhiều năm, chúng tôi thấy các dạng bài tập dưới đây hay được sử dụng để kiểm tra kiến thức ngữ pháp chung của các thí sinh :

#### Dạng 1: Hãy cho dạng đúng của động từ trong ngoặc

1. Look. It (rain). *It's raining*
2. By this time last week, they (visit) Ha Long Bay. *visited*
3. I (finish) the book before my next birthday.
4. He (wake) if you spoke louder.
5. Some animals (not eat) during the winter.

Để làm bài tập này, các em phải nắm được các cách sử dụng thời trong tiếng Anh.

Câu 1 động từ phải có dạng : *is raining* vì hành động đang xảy ra.

Câu 2 động từ phải có dạng : *had visited* vì hành động đã xảy ra và hoàn thành trước một thời điểm ở quá khứ.

Câu 3 động từ phải có dạng *shall have finished* vì động từ sẽ xảy ra và hoàn thành trước một thời điểm ở tương lai.

Câu 4 động từ phải có dạng *would wake* vì đây là thời của động từ trong câu điều kiện ở hiện tại.

Câu 5 động từ phải có dạng *do not/ don't eat* vì đây là một thực tế.

**Dạng 2 : Viết lại những câu sau theo hướng dẫn trong ngoặc**

1. The children have spent all their money at the fair ( chuyển sang câu bị động)

2. Paul informed us about his success. (chuyển sang câu bị động)

3. Do you feel comfortable in here ? The receptionist asked (chuyển sang câu gián tiếp)

4. Morris asked what it was about (chuyển sang câu trực tiếp)

5. She lived in that house. It has been sold. (Chuyển thành câu phức dùng từ nối).

6. He never saw it (chuyển sang câu nhấn mạnh với never ở đầu câu).

7. The people are injured. They go to court to prove their case. (chuyển thành câu phức dùng who).

Dạng bài tập này không chỉ kiểm tra kiến thức ngữ pháp đơn thuần mà nó kiểm tra luôn cả kỹ năng viết của thí sinh. Vì vậy khi làm bài tập kiểu này các em cần đọc đề bài thật kỹ và nhấp cẩn thận trước khi viết vào bài thi để tránh những sai sót đáng tiếc.

Câu 1 và câu 2 đòi hỏi kiến thức về thể bị động và phải chuyển như sau :

1. All their money at the fair has been spent ( by the children).

2. We were informed about his success by Paul.

Câu 3 và 4 đòi hỏi kiến thức ngữ pháp về câu gián tiếp và chuyển như sau :

3. The receptionist asked me / us if/ whether I/we felt comfortable in there.

4. "What is it about ?" Morris asked.

Câu 5 đòi hỏi kiến thức về câu phức hợp dùng đại từ quan hệ và phải chuyển như sau :

5. She lived in that house which has been sold.

Câu 6 đòi hỏi sự hiểu biết về trật tự từ trong câu đó. Câu này được chuyển như sau :

6. Never did he see it.

Câu 7 giống câu 5 phải chuyển như sau :

7. The people who go to court to prove their case are injured.

## B. Ngữ âm

Nếu đem so sánh với các phần khác trong bài kiểm tra thì đây là phần ít được quan tâm nhất và có vai trò mờ nhạt nhất. () phần này người ra đề thi muốn kiểm tra kiến thức về ngữ âm và phát âm của học sinh bằng cách đưa ra một số từ trong đó có một từ có cách phát âm khác, học sinh phải chọn ra được từ có cách phát âm khác đó.

Ví dụ :

1. ☒ a. few      b. new      ✓ c. threw      d. knew

2. a. nicest      b. largest      c. hottest      ☒ d. best.

3. a. bare      b. dare      ☒ c. care      ~~d. car.~~

4. ☒ a. can      b. cell      c. sell      d. felt

Để làm bài tập này, các em cần đọc đúng các từ trong khi học trên lớp và học cách tự đọc các từ mới trong từ điển qua các phần phiên âm quốc tế. Nếu nắm vững được cách đọc của các từ các em

sẽ thấy câu 1 có từ threw đọc khác. Câu 2 có từ best. Câu 3 có car. Câu 4 có từ can.

### C. Từ vựng

Phần này nhằm mục đích kiểm tra cách sử dụng từ đồng nghĩa, trái nghĩa, cách cấu tạo từ, việc sắp xếp từ theo điểm của thí sinh. Các dạng bài tập cho phần này cũng rất đa dạng và phong phú. Dưới đây là một số bài tập phổ biến chúng ta thường thấy trong các bài thi đại học.

**Dạng 1: Tìm một từ thích hợp để kết thúc mỗi câu sau**

1. A typist usually works in an. . . . .
2. A saleswoman usually works in a. . . . .
3. I didn't mean to do it. I did it by. . . . .
4. Your order is not ready yet. You are out of. . . . .

**Dạng 2 : Hãy chọn từ đồng nghĩa thích hợp để điền chỗ bỏ trống**

1. 

give	offer
similar	. . . . .

- a. same                      b. friendly  
c. exact                     d. shameful

2. 

Test	examination
annual	. . . . .

- a. yearly                    b. year  
c. timely                   d. monthly

**Dạng 3 : Sắp xếp các từ theo chủ điểm**

Đất nước – Ngôn ngữ

1. England            2. English            3. Vietnam            4. Russia  
5. Vietnamese       6. China               7. Russian            8. Chinese.

**ang 4 : Chọn từ trả lời đúng trong số A, B, C, D**

1. He couldn't. . . . . his father that he was telling the truth.

- A. admit      B. confide      C. trust      D. convince

His answer was so confused that I could hardly make any. . . .  
. . . . . of it at all.

- A. meaning      B. interpretation  
C. intelligibility      D. sense.

This book gives a brief. . . . . of the history of the University.

- A. reference      B. outline  
C. article      D. research.

My passport. . . . . last month, so I will have to get a new one.

- A. ended      B. elapsed      C. expired      D. researched

If the tiger had got away from its cage, it could. . . . .  
have killed or injured many people.

- A. equally      B. both      C. severely      D. well.

**ang 5 : Chọn đúng dạng của từ cho sẵn để hoàn chỉnh câu**

The thing I hate about John is his. *unreliability* (m)  
(unreliable)

It was complete. . . *failure* . . . . . due to poor planning  
(fail)

She upset him with a. . . *tactless* . . . . . remark about his nose  
(tact)

We love him for his. *honesty* . . . . .  
(honest)

Để làm tốt các bài tập ở phần từ vựng các em phải nắm nghĩa  
a các từ trong khi học và cách sử dụng chúng trong các ngữ  
nh khác nhau. Khi học từ cần chú ý các dạng khác nhau của

cùng một từ, có như vậy chúng ta mới có điều kiện để làm phong phú vốn từ vựng tiếng Anh của mình. Chẳng hạn, khi làm bài thi ở dạng 1, để chọn đúng từ, các em phải đọc hiểu cả câu rồi mới suy luận ra được từ cần phải tìm, vì vậy bài thi này không chỉ đơn thuần kiểm tra vốn từ vựng đơn lẻ của các em mà nó được dùng để kiểm tra cả kỹ năng đọc hiểu nữa. Khi làm bài tập dạng 4 và 5 các em cũng gặp phải yêu cầu tương tự như vậy. Nhưng riêng ở phần 5 yêu cầu kiểm tra khó hơn và điểm số dành cho phần này cũng cao hơn. Để làm được các bài tập ở phần 5 các em không những phải hiểu được câu văn mà còn phải tìm ra được dạng thích hợp của từ cho sẵn. Một từ có thể có nhiều dạng khác nhau, vì vậy trong khi làm bài nếu không cẩn thận chúng ta sẽ bị nhầm lẫn. Ví dụ, khi làm câu 3 của dạng 5 chúng ta thấy từ *tact* có những dạng sau : *tactful*, *tactless*. Nếu không đọc kỹ câu văn các em có thể tưởng rằng điền từ nào vào chỗ trống cũng được vì chúng đều là tính từ. Nhưng từ *upset* trong câu cho thấy chúng ta phải chọn từ *tactless* mới phù hợp.

Dưới đây là đáp án cho các bài tập từ vựng từ dạng 1 đến dạng 5 :

Dạng 1 : 1. office 2. shop 3. chance 4. stock.

Dạng 2 : 1. same 2. yearly

Dạng 3 : Đất nước : England, Vietnam, Russia, China.

Ngôn ngữ : English, Vietnamese, Russian, Chinese.

Dạng 4 : 1. b 2. d 3. b 4. c 5. d

Dạng 5 : 1. unreliability 2. failure 3. tactless 4. honesty.

### **D. Bài tập kiểm tra kỹ năng**

Kỹ năng đọc hiểu và kỹ năng viết là hai kỹ năng được chú trọng nhất trong các bài thi tiếng Anh vào các trường đại học hiện nay. Nhìn chung, về mặt dạng bài chúng ta thấy không có sự khác biệt nhiều lắm giữa các trường đại học, nhưng về mặt nội dung có nhiều điểm khác nhau. Điểm khác nhau mà chúng ta có thể thấy rõ nhất là mức độ khó của các bài đọc và bài viết giữa các trường. Chính vì vậy việc nắm vững các yêu cầu kiểm tra để làm bài cho tốt là hết sức cần thiết. Chúng tôi hy vọng các em sẽ tìm thấy ở phần hướng dẫn này những điều bổ ích và thiết thực.

## I. KỸ NĂNG ĐỌC HIỂU

### Dạng 1 : Đọc và điền từ thích hợp nhất vào chỗ trống

Manned space-craft travel at speeds of almost five miles a second. But space-craft are slow (1). . . . . with the fastest traveler in the (2). . . . . universe-light. Scientists calculate that light travels 186,000 miles in a second !

Swift (3). . . . . it is, light takes time to cross interstellar space. Light from Sirius, a neighbouring star, travels for nine years to (4). . . . . us.

Because of the time light takes to travel the (5). . . . . of space, it is possible to "see" an event long (6). . . . . is has happened. In AD 1054, Chinese astronomers recorded the (7). . . . . of an object that (8). . . . . up the night sky. They were seeing an exploding star. Yet scientists today calculate that the star (9). . . . . more than four thousand years ago. (10). . . . . the Chinese observers, we too may "see" happening vast distances away and long before our own time.

Đây là một bài tập khó vì nó đòi hỏi thí sinh phải có kỹ năng đọc hiểu tốt, kiến thức ngữ pháp chắc chắn và vốn từ vựng phong phú. Thí sinh có thể đoán đúng động từ hoặc danh từ nhưng dùng không đúng thời hoặc số thì vẫn không được tính điểm cho câu trả lời. Khi làm bài tập này các em nên đọc lướt từ đầu đến cuối để nắm chủ điểm và xác định thời của động từ trong bài. Trong quá trình đọc lướt nếu có chỗ nào các em có thể điền từ được ngay thì nên làm trước. Sau khi đã đọc nhanh một lượt, các em quay trở lại làm từng câu một. Trong khi làm các em nên chú ý dựa vào ngữ cảnh, các từ đứng trước và sau chỗ trống để tìm ra từ cần điền. Dạng bài thi này nói chung là khó và chiếm nhiều thời gian, vì vậy các em có thể tập trung làm các phần khác trước khi làm phần này.

Dưới đây là các từ cần điền vào các chỗ trống của đoạn văn :

1. compared

2. known

3. though/as

4. reach

5. distances

6. after

7. appearance

8. lit

9. exploded

10. like

## **Dạng 2 : Đọc một đoạn văn rồi trả lời các câu hỏi**

An English man living near Sheffield recently had a most unlucky day's fishing. He was standing on a low bridge when he had the misfortune to knock his tin of bait into the river. Leaning over the side of the bridge, he tried to hook the tin and pulled it out of the river. As he did so his car keys fell out of his pocket and disappeared in the water. Feeling thoroughly annoyed with himself and his luck, the fisherman leant over the bridge to try to see where his keys had gone. As he did so, the bridge collapsed and he fell into the river. This was the last straw. The fisherman crawled out of the river and went back to his car. There he discovered that he had locked the doors and he could not get in. His anti-thief lock had immobilized his car. There was nothing left for him to do but walk sadly home.

### **Câu hỏi :**

1. How did the tin of the bait get into the river ?
2. When did the fisherman first lean over the bridge ?
3. What made him fall into the river ?
4. How did he get home ?
5. What do you think is the best title for the passage ?

Dạng bài tập này dễ làm hơn so với dạng trước, nhưng khi làm các em nên viết câu trả lời cho cẩn thận và lưu ý đến thời của động từ trong câu trả lời. Các phần gạch chân sẽ giúp các em trả lời được câu hỏi từ 1 đến 4. Riêng câu 5 các em phải hiểu ý của cả bài và tự đặt ra một đầu đề cho đoạn văn. Các em có thể tìm lấy ý trong bài hoặc tự đặt ra một tựa đề dùng từ ngữ mà mình biết, với điều kiện tựa đề đó phải nêu lên được ý chính của cả bài. Trong bài đọc này các em có thể lấy tựa đề : An unlucky fishing days hoặc Misfortune never comes single.

### **ạng 3 : Sắp xếp câu thành một bài hội thoại hoàn chỉnh**

Muốn làm bài tập này tốt các em cần chú ý đến thời gian xảy ra của các sự kiện, các dạng câu hỏi đáp của từng câu. Có như vậy thì mới có thể tìm ra mối liên kết của các câu trong cả bài hội thoại.

1. Yes, we're catching the 8.30 train
2. Thanks. Same to you.
3. Thanks, I'll send you a card the moment we arrive there.
4. So you are off to Weymouth on Saturday.
5. I hope you have a nice holiday and a good rest.
6. Well all the best if I don't see you before you leave.

Sau khi đọc toàn bộ các câu trong hội thoại, các em có thể xếp các câu theo trật tự như sau : 4-1-5-2-6-3.

### **ạng 4 : Sắp xếp câu thành một đoạn văn hợp lý**

(1) It was raining. (2) He was lying on the ground badly injured. (3) An ambulance car was called and the injured man was taken to hospital. (4) On 29 June 1995, John, a worker was working twenty feet above the ground. (5) He slipped on the wet platform. (6) At 2.45 his workmates found him. (7) He fell against the safety rail but it was loose.

Khi làm bài tập này các em nên đọc cả bài từ đầu đến cuối để nắm các mốc của sự kiện. Các mốc này có thể là thời gian, có thể là trình tự diễn ra của hành động. . . v. v. Trong bài này sau khi đọc một lượt chúng ta thấy các sự kiện xảy ra theo trình tự của hành động như sau : 4-1-5-7-6-2-3.

### **ạng 5 : Đọc và dịch một đoạn văn trong bài**

Dịch sang tiếng Việt đoạn văn sau :

For my part I could easily do without the post office. I think there are very few important communications made through it. To speak critically, I never received more than one or two letters in my life that were worth the postage. And I am sure that I never read any memorable news in a newspaper. If we read of one man robbed, or murdered or killed by accident, or one house was burnt

or one vessel wrecked, or one cow run over the Western rail road or one mad dog killed we never need read of another. One enough. If you are acquainted with the principle what do you care for ten thousand instances and applications ? To a philosopher news, as it is called, is gossip, and those who edit and those who read it are old women over their tea. There was such a rush, I have heard, the other day at one of the newspaper offices to learn the latest foreign news, that several plate glass windows were broken by the pressure, yet it was news which I seriously think a clever man might write a year or twelve years before and with sufficient accuracy.

### **Bài dịch :**

Về phần mình, tôi có thể sống thoải mái không cần đến báo điện. Tôi nghĩ rằng có rất ít thông tin được chuyển qua đó. Nhưng một cách nghiêm túc, trong đời tôi chưa bao giờ nhận được nhiều hơn hai lá thư xứng đáng với tiền tem thư. Và tôi chắc rằng tôi chưa bao giờ đọc một cái tin đáng ghi nhớ nào trên báo cả. Nếu chúng ta đọc về một người bị cướp, hoặc bị giết, hoặc chết trong một tai nạn, hoặc một ngôi nhà bị cháy, một con tàu bị đắm, hoặc một chú bò bị cán chết trên đường xe lửa miền tây, hoặc một con chó đại bị giết, chúng ta không cần đọc một tin nào khác. Chỉ một là đủ. Nếu bạn quen với nguyên tắc cần quan tâm đến cái gì trong hàng vạn sự kiện và các cách giải quyết. Đối với một trí tuệ gia, tất cả các tin tức, như người ta vẫn gọi, đều là sự lượm lặt còn những người tạo ra và đọc nó vào lúc uống trà đều là các gia. Tôi được biết hôm kia tại một tòa soạn báo có sự chen lấn đẩy dẽ lấy tin mới nhất của nước ngoài đến nỗi một số ô cửa kính đã bị vỡ - thế nhưng đó là một tin, tôi thật sự cho rằng mình đúng, khi nghĩ rằng một người thông minh nào đó có thể đã vì cách đây một hoặc mười năm về trước.

## KĨ NĂNG VIẾT

**ng 1: Viết câu hoàn chỉnh dựa vào các từ gợi ý**

1. go/work/by bus//
2. return/little house/after/years away//
3. if/left home/7 o'clock/(miss)/first bus//
4. my/teacher/help/get over/difficulties//
5. up/that moment/John/(not have)/doubt//

Bài tập dạng này vừa kiểm tra kĩ năng viết câu hoàn chỉnh, vừa kiểm tra kiến thức về ngữ pháp. Vì vậy khi làm bài các em cần lưu ý các động từ để trong ngoặc, các dạng câu, sự hợp thời... có thể tạo ra các câu vừa có ý nghĩa vừa đúng ngữ pháp. Các em trên có thể viết hoàn chỉnh lại như sau :

1. I(you/they/we) go to work by bus.
2. I(you/we/they) return to my (your/our their) little house after having been many years away.
3. If (I) left home at 7 o'clock (I) wouldn't miss the first bus.
4. My teacher helps me (to) get over the difficulties.
5. Up to that moment John didn't have any doubt.

**ng 2 : Viết lại câu sao cho nghĩa câu không thay đổi**

1. Look at the time ! We ought to be in bed.

It's time we .....

2. "I'm not frightened," he said ; in fact he was terrified.

He pretended not .....

3. If you aren't going to the party, I won't go.

Unless .....

4. Why didn't you tell me about this yesterday ?

You should .....

5. I haven't seen them for about a year.

It's .....

Dạng bài tập này khó hơn so với dạng bài ở trên vì nó không chỉ kiểm tra kĩ năng viết mà còn kiểm tra cả kĩ năng đọc hiểu và kiến thức ngữ pháp. Để giải các bài tập thuộc dạng này các em cần lưu ý tới các mẫu câu và các hiện tượng ngữ pháp đã được học. Chẳng hạn đối với câu 1 các em cần lưu ý mẫu câu : It's time (we) Đây là một mẫu câu dùng để nhấn mạnh và các động từ sau chủ ngữ luôn dùng ở quá khứ vì vậy câu phải viết lại sẽ là *It's time we were in bed.*

Các câu khác có thể viết lại như sau :

2. He pretended not to be frightened ; in fact he was terrified
3. Unless you go to the party, I won't go
4. You should have told me about this yesterday.
5. It's about a year since we last met.

### **Dạng 3 : Dùng từ gợi ý để viết thư**

Dear Mr Carison,

1. Thank you/letter/which/arrive/first post/morning.
2. Perhaps / you / like / telephone / my secretary/ arrange appointment / next week.
3. I/be/usually/free/Tuesday / Wednesday/afternoon
4. Think/you/bring/plans/new office block/when/come ?
5. I/be/very interested/see/them.
6. Of course/it/be impossible/say anything/definite/yet.
7. So much/depend/what/it/cost/my company.
8. In/meantime/I look/forward/see/you/next week.

Yours sincerely,

John Brown

Loại bài kiểm tra này rất hay được các trường sử dụng vì nó dễ chấm và tương đối khách quan trong việc đánh giá và phân loại trình độ của thí sinh. Loại bài này kiểm tra toàn diện cả kiến thức ngữ pháp, từ vựng lẫn kĩ năng viết và đọc hiểu của thí sinh. E

im tốt bài tập này, các em cần đọc toàn bộ các câu trong thư để  
ác định nội dung thư, các mốc thời gian để xác định thời của động  
ừ và các mẫu câu cần được sử dụng. Ví dụ, lá thư trên có thể viết  
ai như sau :

Dear Mr Carson

1. Thank you for the letter which arrived in the first post this morning.
2. Perhaps you like to telephone my secretary to arrange for the appointment next week.
3. I am usually free on Tuesday and Wednesday afternoon.
4. Do you think you can bring the plans of the new office block when you come ?
5. I'll (shall) be very interested in seeing them.
6. Of course, it is impossible to say anything definite yet.
7. So much depends on what it costs for my company.
8. In the meantime I look forward to seeing you next week.

Yours sincerely,  
John Brown.

#### **Dạng 4 : Viết thư theo yêu cầu**

Em là Quang Vinh, ở số nhà 315 Bạch Mai Hà Nội. Sáng nay em viết thư cho bạn em, David Thanh ở số 25, phố King, London WC4, Vương quốc Anh, để kể cho bạn nghe về một thay đổi lớn ở hành phố quê hương em.

#### **Chú ý :**

Bức thư trên phải có hình thức của bức thư viết bằng tiếng Anh dài từ 120 đến 150 từ kể cả ngày tháng và địa chỉ).

Dạng bài này yêu cầu các em phải nắm được bố cục của một lá thư viết bằng tiếng Anh. và thể hiện rõ khả năng viết của mình qua nội dung của thư. Để bài này yêu cầu các em phải nêu lên lược một sự thay đổi lớn ở thành phố quê hương mình và giới hạn

số lượng từ vựng là 120 đến 150 từ. Nếu các em viết quá dài thì sẽ ảnh hưởng đến thời gian làm các bài khác trong đề thi và khi chấm bài các em có thể sẽ bị trừ điểm. Tất nhiên khi viết các em sẽ có rất nhiều ý hay, nhưng đây là bài thi vì vậy chúng ta nên chọn ra một ý nổi bật nhất và để viết cho mình thì kết quả thi sẽ khá quan trọng. Trước khi đặt bút viết các em nên đọc kĩ đầu bài và phác thảo ra một số ý chính. Dưới đây là thư mẫu.

David Thanh

London EC4

15 Dec, 1995.

Dear David ,

I received your letter two weeks ago but I am too busy to write to you. In your letter you wanted me to tell you about the changes in Ha Noi.

You know there are a lot of changes that have taken place here since the day you left Vietnam. But I think the greatest change in Hanoi is the reconstruction of Hanoi in the renovation stage. The streets are clearer and more beautiful. Many new houses, hotels, restaurants and buildings have been and are being built. More shops have been opened. In the evening all the shops and hotels are brightly lit up. If you walk along the streets of Hanoi at night you will have the impression that you are walking in the forest of stars and lights. How wonderful !

There are many other things I want to tell you, but I must finish now. I hope in the next letter I'll tell you more about other changes in Hanoi. Please, write to me and tell me about your new house.

Yours sincerely,  
Quang Vinh

### **Dạng 5 : Viết một bài luận ngắn theo chủ điểm**

**Đề thi :** Hãy viết một bài hoàn chỉnh (từ 120 đến 130 từ) nói về lợi ích của việc nuôi các con vật làm cảnh trong nhà.

Viết luận nói chung là khó đối với tất cả các thí sinh. Hơn nữa, phải ngồi viết trong tình trạng căng thẳng khiến cho công việc trở nên khó khăn hơn rất nhiều. Để giúp các em giải quyết những khó khăn này chúng tôi thấy các em cần làm một số việc sau :

- Các em cần đọc đề bài cho kĩ rồi dựa vào sự hiểu biết của mình để nhanh chóng tìm ra ý chính.

- Tập trung vào một hoặc hai ý chính mà bản thân mình có đủ từ để phát triển thành đoạn. Lưu ý sự nhất quán của ý và các ví dụ minh họa trong khi viết các đoạn văn. Không nên viết đoạn quá dài vì thời gian viết bị hạn chế.

- Các câu văn nên ngắn gọn, xúc tích và phải đúng ngữ pháp. Nếu trong khi viết các em cảm thấy có từ hoặc mẫu câu nào mà mình chưa thật chắc chắn thì nên chọn cách diễn đạt khác tương đương, không nên quá gò ép ý làm cho câu trở nên gượng gạo, sai ngữ pháp.

- Sau khi viết xong các em cần đọc lại bài viết để kiểm tra lại xem có lỗi ngữ pháp hoặc chính tả nào không.

Với đề bài trên các em có thể viết một bài luận hoàn chỉnh như sau :

### **ADVANTAGES OF KEEPING PETS**

Pets have long been human beings' friends, many people keep pets because pets have many advantages. One of the prominent advantages is that pets provide their owners with company.

Many people consider pets as their relatives or friends. When they come home their dogs or cats come to greet them. Dogs usually bark "hello" and jump up to shake hands with their owners. Cats

are quieter. They only run here and there or rub their backs against the feet of their owners in order to show their feelings and

warmth. Many lonely people spend hours talking to their cats or dogs. When their pets are sick they are ready to spend a lot of money on medicine or other medical treatments. Many pet lovers even give their dead pets a burial ceremony like that of a human being.

In short, Pets have become very close to Man since it was given a place by the cave fire. They will become more and more useful to us if we know how to keep them properly.

### **Dạng II : Dịch sang tiếng Anh.**

1. Việt Nam là một dân tộc yêu chuộng hòa bình nên nhân dân Việt Nam đã và đang làm hết sức mình để gìn giữ hòa bình.

2. Kể từ khi công cuộc đổi mới bắt đầu, quan hệ quốc tế của nước ta không ngừng được mở rộng.

Dịch là một bài tập khó vì nó đòi hỏi ở người dịch không những kiến thức về ngữ pháp, từ vựng, lượng từ vựng phong phú mà cả vốn kiến thức chung và sự am hiểu tiếng mẹ đẻ. Vì vậy việc đánh giá kĩ năng viết qua dịch nhiều khi không khách quan. Lí do này khiến một số trường bỏ phần dịch Việt Anh trong bài thi viết.

Khi phải làm bài tập này các em nên đọc kĩ câu cần dịch một hai lượt. Sau đó tìm mẫu câu tiếng Anh tương đương về ý. Trong khi dịch các em nên lưu ý đến thời của động từ trong câu, giới từ, cách viết từ... Các em không nên dịch ghép từ.

Hai câu trên có thể dịch như sau :

1. Vietnam is a peace-loving nation, so the Vietnamese have been trying their best to safeguard peace.

2. Our international relations have been extended since the renovation process was initiated.

(be frequently referred to as "white collar workers" for the simple reason that they usually (5) ..... (wear) a collar and tie go to work. Such is human nature that a great many people (6) ..... (be) often willing to sacrifice higher pay for the privilege of becoming white collar workers. This can give rise to curious situations, as it did in the case of Alfred Bloggs who

- (7) ..... (work) as a dustman for the Ellesmere Corporation. When he got married, he simply (8) ..... (tell) his wife that he (9) ..... (work) for the Corporation. Luckily, Alfred has just found another job he soon .... (work) in an office as a junior clerk.
2. It is not necessary to go abroad in order to learn something new about the world. In our own city, even in our own village, there (1) ..... (be) probably a great deal to be learnt, and certainly no one (2) ..... (see) all that is beautiful or interesting in his own country. We can usually see mountains that we (3) ..... (not climb) yet, and if we (4) ..... (reach) the top of one we shall see another in the distance. If we (5) ..... (walk) along the river, we (6) ..... (find) stream running into it and (7) ..... (wonder) where they (8) ..... (come) from. Every valley (9) ..... (give) us a new view. Even on a short walk we may see birds and trees and flowers of which we (10) ..... (not know) the names.

Smoking causes one million yearly deaths in the world every year. Throughout the world, women (6) (live) longer..... Why ? Because men (7) ..... (smoke) more. All of these facts from research (8) ..... (show) that smoking is bad. So why people (9) ..... (smoke) ? Young people start smoking because everyone else (10) ..... (smoke). They feel grown up and independent.
4. In the relatively short span of twenty five years there has been an incredible evolution in the size and capabilities of computers. Today, computers smaller than the tip of your fingernail (1) ..... (have) the same capabilities as room-sized

machines of twenty five years ago. The first computers (1) ..... (be) developed around 1945. They were so large that they (2) ..... (require) special air-conditioned rooms. About twenty years later, in the 1960s, desk-sized computers were developed. This (3) ..... (represent) a gigantic advance. Before the end of that same decade, however, a third generation of computers, which (4) ..... (use) simple integrated circuits and which (5) ..... (be) even smaller and faster, (6) ..... (appear). In 1971, the first microprocessor less than one square centimeter in size, (7) ..... (be) developed. Today, electronic engineers (8) ..... (predict) that even smaller and more sophisticated computers (9) ..... (be) on the market before the end of this decade.

15. Language is one of man's most precious possessions. Without it, he (1) ..... (be) unable to exchange ideas with his fellow men. In the Middle Ages, Latin (2) ..... (be) the universal language. Most university classes were conducted in Latin, and all important documents (3) ..... (be) written in that language. Gradually, however, Latin (4) ..... (fall) into disuse, and by the 18th century, French (5) ..... (become) the language of diplomacy. Today, however, English is commonly used to transact international affairs. For this reason, English (6) ..... (be) referred to as a universal language.

There are various reasons why English (7) ..... (come) to occupy the important position it (8) ..... (do) today. The few dialects in English (9) ..... (give) an advantage of being a standard language. In addition, English has ambiguities that are found in many other modern tongues. This (10) ..... (make) it ideal for the transaction of business and international affairs.

16. Children's education is changing very rapidly today. In the past, teachers (1) ..... (make) children sit still for hours. The

made them memorise all sorts of things. Today, many teachers (2) ..... (wonder) if it (3) ..... (not be) possible to make children learn at all. They (4) ..... (say) they can only help them to learn. They say you must let children learn and discover things for themselves. For some children, school (5) ..... (be) a kind of prison. They are at school only because their parents make them go. They get out of the classroom as soon as the teacher (6) ..... (let) them leave. Many of them want to find jobs but the law (7) ..... (not let) them work until they (8) ..... (reach) a certain age. And so, they (9) ..... (have) to stay in school. Often they all (10) ..... (hate) every moment.

7. Today I'd like to begin a discussion on the problem of the heating up of the earth. First, we (1) ..... (touch) on the relationship between fluorocarbons and the ozone layer. You probably (2) ..... (remember) that the ozone layer (3) ..... (be) the protective shield around the earth. It is important to all life because it (4) ..... (filter) our harmful ultraviolet light from the sun. Ozone itself, a form of oxygen, is regularly made by the action of the sun in the upper atmosphere. It (5) ..... (be) also regularly destroyed by natural chemical processes. The problem now is that too much of the ozone layer (6) ..... (be) destroyed. Scientists (7) ..... (suspect) chemicals such as fluorocarbons, (8) ..... (contribute) to this depletion of the ozone. How we (9) ..... (use) fluorocarbon? The most common uses are in spray cans and automobile cooling systems. The chemical pollution from these fluorocarbons accounts for some of the ozone losses that (10) ..... (be) reported. There are now studies linking the sun itself to the depletion of the ozone layer.

8. My most embarrassing experience happened when I had just left university. I just (1) ..... (start) teaching in a Liverpool secondary school. One morning my alarm clock (2) ..... (not ring), (3) ..... (forget) to wind it up. I woke up at half past eight

and school(4).... (begin) at 9. I quickly washed, shaved, dressed, jumped into my car and(5).... (drive) to school. When I arrive the students already(6)... (be) in class. I didn't go to the staff-room but (7) ..... (go) straight into the class. After two or three minutes the students(8)..... (begin)laughing and couldn't know why. Suddenly I (9)... The house has many large rooms which are well decorated. He wants to show her everything he(8)... (buy)recently. He thinks she (9).... (be)pleased to see the lovely garden behind the house. It is a very modern house, so it (10)... (look) strange to some people. It must be the only modern house in the district.

20. Natural resources are the materials that we (1)... (need) to run our society. They (2).... (come) from the rocks, the oceans, and the tissues of the animals and plants that (3).... (live)on the Earth with us. These materials (4).... (be) used directly, or processed and shaped into household products, clothes, machinery, building etc. The thousands of different materials that we (5)..... (need)to maintain our standard of living can be classified into renewable and non-renewable resources. The former (6).... (include) cotton, trees, rubber, animals and cellulose. With proper management, such resources (7)..... (be) available for man's use indefinitely for example as long as sufficient water, food and care (8)..... (be) made available. Animal populations such as sheep and cattle (9) ..... (be) able to grow and reproduce.

I'm Kurt Thommen (1). . . . Zurich (2). . . . Switzerland. I'm a photographer (3). . . . a wildlife magazine. I need English because most (4). . . . handbooks are written in it and I travel alot. Next month, I'm going to visit South -East- Asia. I hope I'll be able to make myself understood, I've found that it is often easier to speak English. (5). . . . other foreigners than native speakers. Some had got thick blankets and some flasks of hot drinks, knowing that the men would be cold and tired. When dawn began to break over (8). . . the east a small point of light was seen (9). . . the darkness of the water and a few minutes later, there was a shout before long, the two boats were turning in, past the lighthouse to the inside (10). . . the harbour. In the end, I decided <sup>to</sup>(9) wear my most expensive clothes. These were a pair of boots, a pair of fashion jeans which had cost me a week's salary, a hand-made sweater and a coat. I was not (10) <sup>so</sup> satisfied with my appearance, but at <sup>last</sup>(11) everything was new and expensive.

In fact, I realized ... (12) my arrival that I had chosen exactly the wrong clothes. The men in the office ... (13) wearing dark suits and ties. The women wore business suits.

The boss was just ... (14) friendly as his letter had been. We looked ... (15) the offices, chatted about the business, and finally went out for lunch. They had chosen a smart restaurant nearby where the boss was ... (16) well known. The restaurant manager greeted him ... (17) name. Then he caught sight of me. He shook his head apologetically, and smiled. "Sorry", he said, the house rules were quite ... (18). No one in jeans would be admitted. I ... In that part of the world, it was snobbish to own an English car. My contractor there, a successful businessman, had decided to prove his success by getting, not (1)... an English car, a vastly expensive antique Rolls Royce, (2)... also a right-hand drive one. The car had (3) ... to be shipped specially from England. The instructions were in English, with the instruments in miles rather (4)... kilometres, and degrees Fahrenheit (5)... of degrees Centigrade. My friend was immensely proud (6)... it. A real English Rolls Royce, he said, was the (7) ... of fashion. His friends, he said, would be green (8)... envy. The car arrived, and 2 days (9)... we had to make a trip to a town three hours' (10)... away. We set off in the hot morning sun, getting admiring (11)... from people in the street. My friend spoke enthusiastically of his car. It was (12) ... a pleasure to drive, he said, that he (13)... not imagine why everyone (14) ... not buy one. Out (15)... the open road, we went faster. The air was not hot, and my friend tried to switch on the air-conditioning (16)... he could find was a heater. I told him that, in England, heaters were more necessary than air-conditioning. He would not (17)... me. He tried all the other switches, but kept returning to the heater. The outside air, which was already uncomfortably hot and dry, was made (18)... hotter, and was blown into to the car. Again and again, he tried the switches. Again and again a blast of hot air hit us. It was painful to breathe. "I'm sending this car (19)... back to the makers," he gasped : there's (20)... badly wrong with the air-conditioning."

About 3 years (1)..., in my mid-forties, I had a sudden and severe mental breakdown. There was nothing unusual about the breakdown itself, (2)... about the events in my own life that (3) ... up to it. The (4)... exceptional feature was that I am (5) ... psychologist and should therefore be able to view the events of my illness (6)... two standpoints, subjectively as the patient and (7) ... objectively as the detached professional observer. A good book (11) ... photography would make us better (12)... taking pictures, but most of us are too lazy to bother. I asked Jonathan what was the worst film he had ever seen. He didn't have to think very hard (13)... the question. At once he answered, "Twenty four shots of the photographer's left ear".

### **Hire - Purchase**

The system of buying goods by hire-purchase became very common during the first half of the 20<sup>th</sup> century. Today a large proportion of all families in Great Britain buy furniture and household goods paying by instalment. In the United States of America the proportion is much higher than in Great Britain. The price of the goods bought in this way is always higher than the price that would be paid in cash. One part of the price, perhaps one-quarter or one third, is paid by the buyer when the goods are delivered to him. He then makes regular payments, weekly or monthly, until the full price has been paid. But if the buyer can not pay the instalment at the fixed time, the goods are returned to the company.

One of the most striking features of English life is the self-discipline and courtesy of people of all classes. There is little noisy behaviour. People do not rush excitedly for seats on buses or trains, but take their seats in a quiet and orderly manner. Englishmen are naturally polite and are never tired of saying "Thank you", "I'm sorry", "I beg your pardon". If you follow anyone who is entering a building or a room he will hold a door open for you. Many foreigners have commented on a remarkable politeness of the English people.

English people don't like displaying their emotions even in dangerous and tragic situations and ordinary people seem to remain good-tempered and cheerful under difficulties.

#### **My hobby**

My hobby is collecting stamps. When I was still a baby, my mother began to collect for me, of course, she did not let me touch the stamps till I was old enough not to spoil them. I remember that it was on my 15th birthday that she first put them into my hands. They were in four fat books, but since that time, I have added three more, so that now I have a bigger collection than any of my friends.

How do I get my stamps ? I have friends both here and in other lands who send me stamps in return for ones that I send to them. Now that I am working for my living, I do not have as much time as before to spend on my stamps, but in the evenings, what can be better than to sit down at a table with my precious books arranging new stamps in them, writing in the names of countries, or if I am too tired, only looking through stamps already in the books ? Each stamp has a story to tell me of far countries and strange people. I see pictures of men and women, birds and animals that I have never seen, Kings and presidents pass before my eyes and I can follow the history of nations.

But my stamp collection does not make me think only of the past. Just as my mother collected for me, so I too am collecting for my future child. What better way will there be of interesting to him in history, geography and languages, and of making these subjects live for him instead of being only things in school books ?

The human race is spread all over the world, from the polar regions to the tropics. The people of which it is made up eat different kinds of food, partly according to the kind of food which their country produces. Thus, in India, people live chiefly on different kinds of grain, eggs, milk, or sometimes fish and meat. In Europe, people eat more flesh and less grain. In the Arctic regions, where no grain and fruits are produced, the Eskimo and other races live almost entirely on flesh, especially fat. The men of one race are able to eat the food of another race, if they are brought into the country inhabited by the latter. But as a rule, they still prefer their own food, at least for a time. In warm climates, flesh and fat are not much needed, but in the Arctic regions they seem to be very necessary for keeping up the heat of the body.

2. Why are flesh and fat needed in Arctic regions ?

3. What does the word ' latter' refer to ?

Television now plays such an important role in so many people's lives that it is essential for us to try to decide whether it is good or bad. first of all, television is not only a convenient source of entertainment, but also a rather cheap one. For a family of our, for example, it is more convenient as well as cheaper to sit comfortably at home than to go out. There is no transport to arrange. They can't have to pay for expensive seats at the theatre or in the cinema. All they have to do is to turn a switch, and they can see plays, films of every kind, not to mention political discussions and the latest exciting football match. Some people, however, say that this is just where the danger is. The T.V viewer need to do nothing. He doesn't even use his legs. He makes no choice. He is completely passive and has everything presented to him. T.V , people often say, informs one about current events, the latest developments in science and politics, and presents an endless series of programmes. The most farway countries and the strangest customs are brought into one's living-room. Yet, here again there is a danger. We get to like watching T.V so much that it begins to dominate our lives, and we don't have time to talk to each other and do other things. There are many arguments for

and against T.V. I think we must understand that T.V in itself is neither good nor bad . T.V is as good or as bad as we make it.

**Man in space**

After the war, Soviet rocket technique rapidly developed. On Oct. 4th, 1957 Moscow radio broadcast the news of the tremendous achievement, the Soviet Union launched the world's first artificial satellite. The Russian word "sputnik" in one day became an international word.

Since that time, the Soviet Union has launched many other heavier sputniks and rockets to trail the path of man to the planets and the stars.

The whole world was waiting for the first manned space flight. Few people doubted that it would happen in the Soviet Union. Nevertheless, the actual flight came as a complete surprise. On April 12th 1961 a Soviet pilot, Yuri Gagarin, took mankind's first stop into space.

The dream of Tsiolkovsky and other pioneers of space flight has come true. The Soviet spaceship Vostok has become the symbol of

human intelligence and courage a scientific platform for man to reach out and touch the distant stars and secrets of the Universe...

#### **On an English farm in October**

October is a busy month for any farmer. Of course, every farmer has one advantage over most people as long as he remains a farmer, he can never be out of work. On everyday in the year, he has only to go outside his house, and there, in his fields and farm buildings he will see hundreds of jobs waiting to be done. But in October there always seems to be three months' work to be done in one. The two most important jobs are to finish the harvesting of last year's crops, and to begin preparations for next year's harvest. All the grain is now in the stacks or in the thatched sheds safe from the rain. The potatoes were dug in September and are now stored in pits and the apples have been sold, stored or made into cider. But there are two crops which still await to be harvested - mangoes and sugar-beet. The wheat crop that will be harvested next August must be sown in Autumn. The best time to sow is the last fortnight in October and the first fortnight in November. If you sow much later, the cold weather may get in and your wheat will take months

to come up, and all this time, the rooks and starlings will be digging up the seeds and eating them.

What else is there to do in October ? Many other things ;for example, the poultry must be looked after. Then there are some hedges still untrimmed. But what with harvest and threshing, and wheat-sowing, and ploughing, and one thing and another, there hasn't been time to finish them all. Still, on a day when it's too wet to sow, even to pull roots, the men can do a little hedge-trimming. Will it be fine tomorrow ? It had better be, for tomorrow is November.

1. What is the best season for sowing wheat in Britain ?

2. Can you use one word to name hens,ducks, geese etc ?.

### *Exercise 8 .*

Parents whose children show a special interest in a particular sport have a difficult decision to make about their children's careers. Should they allow their children to train to become top sportsmen and women ? For many children it means starting very young and school work, going out with friends and other interest have to take second place. It's very difficult to explain to a young child why he or she has to train for five hours a day, even at the weekend, when most of his or her friends are playing. Another problem is of course money. In many countries money for training

is available from the government for the very best young sports men and women. If this help cannot be given it means that it is the parents who have to find the time and the money to support their child's development ;etc. This can all be very expensive.

Many parents are understandably worried that it is dangerous to start serious training in a sport at an early age. Some doctors agree that young muscles may be damaged by training before they are properly developed. Professional trainers, however, believe that it is only by starting young that you can reach the top as a successful sports perso. What is clear is that very few people do reach the top and both parents and children should be prepared for failure even after many years of training.

1. This is from

- a. a letter.
- b. an advertisement.
- c. a sports diary
- d. a newspaper article.

2. What is the writer's intention ?

- a. to inform about training
- b. to give details about traning costs.
- c. to give details about training costs.
- d. to suggest a training programme .

3. How do some governments help young people who are good at sport ?

### Exercise 9 .

I've always been a careful driver. I always. I think that's something to be proud of in fact. I've only ever had one accident in my life, and that wasn't serious. Just a little knock that's all. It must have happened thirteen .... or perhaps fourteen years ago. I had a job as a van driver. I still have actually. I was driving home from Birmingham. The van was one of those long wheel-bas Ford Transits, and it didn't have any back windows. For security you know, it just had door mirrors. It was a filthy night, pouring down, and the journey was very slow indeed. I was starving hungry and it was getting late. I saw a sign ahead for a village. It was Kiddleworth, I think. Anyway, I remembered passing a sweet shop there that stayed open late at night. As I said, the rain was beating down I decided to get some chocolate. There was a big parking space outside the shop and I drove straight in. Because of the rain I moved into his passenger's seat, slid the door open , it had sliding doors and dashed into the shop. I put the correct money on the counter, grabbed a Mrs. Bar, and went straight back into the van through the open passenger door I looked carefully in the door mirrors and put it into reverse. Crash ! I smashed straight into a Mini it must have parked behind me during the few seconds I was in the shop, and it was too small to see in the door mirrors. It was my fault if van drivers can't see they're supposed to walk round the van. I just forgot. But I've never had accidents since.

**Digital phone revolution**

When telephoning friends in Australia, would you like to see pictures of them at the same time ? When calling a garage about a broken car, would you like to look at diagrams in a part of the catalogue ? When discussing financial figures, would you like to have them transferred into your own desk-top computer ?

If this can be done now - by big businesses with the money and expertise required. But in a few years ordinary people should be able to do the same. This became clear at the Telecom Fair, a trade exhibition and conference for the world's telecommunications community in Geneva earlier this month. There are facsimile machines able to transmit a document in six seconds (compared with the present 60 seconds), and one that can transmit in colour. There are picture phones which send and display a series of still photographs of the people talking on the line. And there are drawing pads which allow your doodles to appear on another pad at the receiving end. The technology for integrating communication services over a digital network is available now. But the telecommunications world has not yet defined all the standards necessary or a truly global network to emerge. This could take up to ten years.

In the future, terminals will look very different from normal telephone handsets. They will have video screens typewriter keyboards, drawing pads or printing devices. It is possible to have an intelligent terminal which could read a credit card, send data automatically to the computer centre, and then have the person say a few words in the telephone for the computer to recognize the voice pattern before authorization. It should work well unless you have a heavy cold !

### *Questions.*

1. Who was the Telecom Fair for ?

2. What will telephone terminals be like in the future ?

3. Why will it take up to ten years for a global network to merge ?

Charlie Stowe waited until he heard his mother snore before he got out of bed. Even then he moved with caution and tiptoed to the window. The front of the house was irregular, so that it was possible to see a light burning in his mother's room. But now all the windows were dark.. Charlie Stowe was frightened. But the thought of the tobacconist's shop which his father kept down a dozen wooden stairs drew him on. He was twelve years old, and already boys at the County School laughed at him because he had never smoked a cigarette. The packets were piled twelve deep below, and the little shop lay under a thin layer of stale smoke which would completely cover up his crime. That it was a crime to steal some of his father's stock. Charlie Stowe had no doubt, but he did not love his father ; his father was unreal to him, a shadowy figure, pale, thin, indefinite, who noticed him only occasionally and left even punishment to his mother. For his mother he felt a strong love ; ... from her speech he judged her the friend of everyone... But his father's affection and dislike were as indefinite as his movements. Tonight he said he would be in Norwich, and yet you never knew. Charlie Stowe had no sense of safety as he crept down the wooden stairs...

At the bottom of the stairs he came quite suddenly into the little shop. It was too dark to see his way, and he did not dare to touch the switch. For half a minute he sat in despair on the bottom step with his chin in his hands. Then the regular movement of the search light was reflected through an upper window and the boy had time to fix in memory the pile of cigarettes, the counter, and the small hole under it. The footsteps of a policeman on the pavement made him grab the first packet in his hand and dive for the hole. A light shone along the floor and a hand tried the door, then the footsteps passed on, and Charlie hid in the darkness. At last he got his courage back by telling himself in his strangely adult way that if he were caught now there was nothing to be done about it, and he might as well have his smoke. He put a cigarette in his mouth and then remembered that he had no matches.

### Questions.

1. How could Charlie see that his mother's window was dark ?

2. How did Charlie feel about his father. ?

3. What did Charlie do when he heard the policeman ?

Through a series of experiments an American scientist has obtained an understanding of the social structure of the most complex of ant societies. The ants examined are the only creatures other than man to have given up hunting and collecting for a completely agricultural way of life. In their underground nests they cultivate gardens on soil made from finely chopped leaves. This is a complex operation requiring considerable division of labour. The workers of this type of ant can be divided into four groups according to size. Each of the groups performs a particular set of jobs. The making and care of the gardens and the nursing of the young ants are done by the smallest workers. Slightly larger workers are responsible for chopping up leaves to make them suitable for use in the gardens and for cleaning the nest. A third group of still larger ants do the construction work and collect fresh leaves from outside the nest. The largest are the soldier ants responsible for defending the nest.

To find out how good the various size-groups are at different tasks, the scientist measured the amount of work done by the ant against the amount of energy they used. He first examined how efficiently these ants could find leaves and run back to the nest. Then he repeated the experiment for each of the other size-groups. In this way he could see whether any group could do the job more efficiently than the group normally undertaking it. The intermediate-sized ants that normally perform this task proved to be the most efficient for their energy costs, but when the scientist examined the whole set of jobs performed by each group of ants it appeared that some sizes of worker ant were not ideally suited to the particular jobs they performed.

**Mr Woolf works very hard**

<sup>a</sup>There was one thing that I found rather strange on my first day as<sup>v</sup>housekeeper at Monk's House. The floors in the house were very thin. The bathroom was directly above the kitchen, and when Mrs. Woolf was having her bath before breakfast, I could hear her talking to herself. On and on she went, talk, talk, talk, asking questions and giving herself the answers. I thought there must be two or three people up there with her. When Mr. Woolf saw that I looked surprised, he told me that Mrs. Woolf always said the sentences out loud that she had written during the night. She needed to know if they sounded right and the bath was a good place for trying them out. I was not allowed to make coffee at

Monk's house - Mr. and Mrs Woolf were very particular about coffee and always made it themselves - so Mr Woolf came into the kitchen at eight o'clock and always made it. When we carried the breakfast trays to Mrs Woolf's room I noticed that she had always been working during the night. There were pencils and paper beside her bed so that when she woke up she could work, and sometimes it seemed as though she had very little sleep.

I can always remember her coming to the house each day from the writing- room ; when I rang the bell for lunch at one o'clock she used to walk down through the garden smoking one of her favourite cigarettes in a long holder. She was tall and thin and very graceful. She had large, deep-set eyes and a wide curving mouth - I think ,perhaps, it was this that made her face seem particularly beautiful. She wore long skirts - usually blue or brown - in the fashion of the day, and silk jackets of the same colour. Her cigarettes were made from a special tobacco called My Mixture. Mr Woolf bought it for her in London, and, in the evenings, they used to sit by the fire and make these cigarettes themselves. Mrs Woolf wore clothes that suited her well. I pressed them for her and did any sewing that was necessary - she was not able to sew, although sometimes she liked to try. There was one thing in the kitchen that Mrs Woolf was very good at doing ; she could make beautiful bread.

From this survey, one can estimate that fewer than one in five children have some contact with a hospital teacher - and that contact may last two hours a day. Most children interviewed were surprised to find a teacher in hospital at all. They had not been prepared for it by parents or their own school. If there was a teacher they were much more likely to read books and do maths or number work ; without a teacher they would only play games. Reasons for hospital teaching range from preventing a child falling behind and maintaining the habit of school to keeping a child occupied, and the latter is often all the teacher can do. The position and influence of many teachers was summed up when parents referred to them as the library lady or just the helper.

Children tend to rely on concerned school friends to keep in touch with school work. Several parents spoke of requests or work being ignored or refused by the school. Once back at school, children rarely get extra teaching, and are told to catch up as best as they can.

Many short-stay child-patients catch up quickly. But schools do very little to ease the anxiety about falling behind expressed by many of the children interviewed.

1. It seems that the children interviewed in hospital
  - a. liked having math lessons regularly
  - b. wanted to play games most of the time
  - c. did not expect to receive any teaching
  - d. did not want any contact with their schools

2. It is suggested that most teachers of children in hospital were
  - a. successful in getting the co-operation of parents
  - b. unable to get help from other hospital staff
  - c. unable to provide a proper teaching programme
  - d. in a position of great influence in the hospital
3. Some children in hospital are able to keep up with their school work because
  - a. the nurses try to teach them
  - b. their friends help them to do so.
  - c. teachers from the school come to the hospital
  - d. their parents bring them books from the library

*Exercise 15.*

I can not stress too much the importance of watching your opponent, of knowing exactly where he is on the tennis court and what he is doing. It is usually possible to work out the pattern of his game very early in a match. Test him at the front of the court. Try hitting one or two balls high up to see what his shots are like. The more quickly you discover his weaknesses, the easier the match should become.

Now and again it may be a good idea to give your opponent an opportunity of making a mistake. If, early in the match, it seems that he is a very accurate player, then you should tempt him to play a winning shot. Give him the opening, for there are some players who simply can not hit winners. They will try to play an attacking game but they can not quite finish it off. The way to break up their steady game may be by putting them into the front of the court. It is obviously wiser to try to decide at the beginning of the match whether your opponent is weaker on his left-hand or on his right-hand side, and then play a little more than fifty percent of your shots down that side. play a normal attacking game,

or the game you think you will win, but concentrate on the weaker side. A number of players experience more trouble than others in the back corners of the court—always be ready to recognise this weakness. Perhaps an opponent has a favourite backhand shot, but lacks certainty with his forehand shot. Tempt him to play the forehand shot.

There are advantages in learning as much as possible about another player even before you play with him. When you know, in a competition, who your next opponent will be, try to watch him play beforehand. It is only under match conditions that his weaknesses are likely to show—you are bound to pick up some information, even if it's a basic thing such as slowness in reaching the front of the court's opponents so that rarely does a member walk on to a court without knowing what to expect.

They say every small child wants to be an engine-driver. But I myself wanted to be a pilot. I used to spend hours at the local airport with my brother writing down the plane registrations. I knew everything about plane or planes. When I was 12 I began to realize that the thick glasses I had to wear would make that ambition impossible. It's always ! It's funny. I really can't stand flying now. I often have to travel in my job and I suppose I've got used to flying. I am still a collector, but now it's Chinese ornaments, not plane registrations I think I've become something of an expert on 19th century English China. I'd really like to write a book about it. Except for a number of high school students who can continue their studies in colleges or universities, a large majority of school-leavers experience their transition from school to work with the feeling of hope and worry. To them, the end of school means the beginning of their independent new life. They are eager for their first job because it will help them contribute a bit to their family budget, feel better about themselves, and above all, give them the

desirable status of "workers". But they soon realize that they are ill-prepared for employment. They know little about their future job, and have no ideas of the tasks involved in it. When the time to start work gets nearer, many of them begin to worry and build up all sorts of fear in their minds.

Thus, it is the responsibility of the family, the school and the whole society to help these school-leavers get over the obstacles, uncertainties and even disappointments they usually encounter when entering life.

### *Questions.*

1. What feelings do most school boys and girls have when entering life ?

2. Is the transition from school to work quite smooth for these school-leavers ? Why ?

3. Which sentence gives the main idea of the passage ?
  - a. pupils are very upset and worried when they are going to finish school.
  - b. preparing for life, school boys and girls are eager and worried ; the responsibility of the family and the whole society is to help them because they know almost nothing about employment
  - c. pupils want to start working to get money for their families.

In the future, astronauts will be required to descend from a spaceship while it is still in space and to return to it. The ability to do this will be necessary in future flights to distant planets. Scientists are now trying to discover if this is possible. The spaceship Astra which left the Earth for a short time ago will be travelling 300 miles into space. At a certain point, the Astra will

stop for a short time and an astronaut will attempt to leave the stationary spaceship and then return to it. We shall not know whether the experiment has been successful until we received a radio message. This first message is expected to arrive at 7 o'clock this evening. By that time the Astra will have been flying through space for 17 hours and will have circled the earth a great many times.

In many places in the world today, the poor are getting poorer while the rich are getting richer and the programmes of development planning and foreign aid appear to be unable to reverse this trend. Nearly all the developing countries have a modern sector, where the patterns of living and working are not only unsatisfactory but in many cases are even getting worse.

The poor in developing countries have such limited work opportunities that they can not work their way out of their situation. There is no hope for them in the rural areas, so they drift into the big cities, which causes many social as well as economic problems. The mass migration into the cities called urbanization is one of the most serious problems facing the developing countries.

The problem can be solved quite simply by promoting economic growth outside the big cities and maximising work opportunities for the unemployed or underemployed. It is more important that everybody should produce something than that a few people should each produce a great deal.

### Questions.

1. Decide which sentence (s) is (are) true ?
  - a. In many less developed countries, the government has only concentrated resources and property on some sectors.
  - b. People in under developed countries are becoming poorer and poorer

#### Thai boxing

Boxing is popular in many countries. Two fighters wear boxing gloves on their hands. A bell rings. The boxers hit each other until one knocks out the other. Each part of the fight is 3 minutes long. It is called a round. Thai boxing is different. The boxing match begins with music from drums and flutes. Then the two fighters kneel and pray to God. Next they do a slow dance that copies the movements of Thai boxing. During this dance, each fighter tries to show the other he is best.

Then the fight begins. In Thai boxing, the fighters can kick with their feet and hit each other with the bows and knees, of course they hit with their hands too. Each round is 3 minutes long. Then the boxers have a 2 minute rest. Most boxers can fight only 5 rounds because this kind of fighting is very difficult.

Thai boxing began over 500 years ago. If a soldier lost his weapons in a battle, he needed to fight with just his body. The soldiers learned how to use all the parts of their body. In 1560, the Burmese army captured Naresuen, the king of Thailand in a war. King Naresuen was a very good boxer. He won his freedom from Burma by defeating all the best Burmese fighters. When he returned to Thai Land, his people were very proud of him. Thai boxing became a popular sport.

Camping holidays are always popular with students and young people – they are a cheap and easy way to see a country. People often travel by train, coach or on foot, so one thing is important to remember before starting : you can take with you what you can carry – usually in a rucksack on your back.

If you travel with a friend, of course, some items can be shared – a tent, a gas stove, food. Other things must be taken by each person—clothes ; foot wear, a sleeping bag. Many people who go camping for the first time take too much and then find they have

forgotten the essentials – a tin of beans is no good without a tin opener ! But with practice and good advice you can have a fantastic holiday.

Our planet Earth is one of nine planets revolving around the sun, a fairly small and ordinary star, which lies in the outer areas of the Milky Way Galaxy. There are about 250 billion stars in our galaxy, and billions of galaxies in universe. People have always wondered about the possibility of intelligent life forms on other planets. In recent years, this has become serious scientific speculation. Some scientists believe that there must be large numbers of stars with planets which could support living intelligent beings. Perhaps we shall never know. The nearest star is 4.3 light years away. A light year is the distance covered by light (travelling at almost 300.000 kilometres a second) in one year. It would take the fastest Earth spacecraft about 40,000 years to reach the nearest star. For a number of years radio telescopes have been trying to pick up signals from outer space, so far without success. There are, however, millions of possible radio frequencies, and there is no reason why a completely alien civilization should not use a different type of communication, such as X-rays or even a type of wave we have not yet discovered. Suppose contact were made with beings 300 light years away. By the time we had send our reply, and received their response the earth would be 600 years older. It would be an interesting, but rather slow moving conversation !

For the seventh year in a row, thousands of scientists from around the world gathered last week to share their research and insights on the frustrating and fascinating disease that has challenged them for a decade. Although this year's international Conference on AIDS in Florence was less politicized than in previous years, there were some bitter demonstrations over a U.S immigration policy that bans anyone carrying the AIDS virus. There were gloomy predictions that by 1997 ; 15 million people will be infected world wide. Scientists reported that it is easier to get AIDS through heter sexual intercourse than most people think. But the conference offered good news as well : researchers now understand better why some people carrying the virus remain free of symptoms for a decade or more and new drugs hold out the promise of prolonging many lives.

AIDS will be with us for a long time to come. An estimated 8 million to 10 million people are infected right now. By 1997 newly - diagnosed cases of the disease will likely reach a plateau in the industrialized world, but transmission will explore in the developing nations. In Asia, AIDS is spreading fastest in Thailand (where an estimated 15 percent of female prostitutes are infected) and in India. During the next couple of decades in the third world,

AIDS will become the leading cause of death for adults in their most productive years.

Britain is served by a complete network of public libraries, administered by local public library authorities. These libraries have a total stock of some 115 million books (not including the libraries in publicly maintained schools).

Qualified and specialist staff are available for consultation in all but the smallest service points. About one third of the total population are members of public libraries. This lending and reference library service is, with some limitations, free.

Public libraries not only lend books, music scores and records, but also provide special libraries for, among others, children, patients in hospitals and prisoners, and they engage in many kinds of extension activities, such as play readings, lectures, film shows, and co-operation in adult education.

### Exercise 26.

All the different plants and animals in natural community are in a state of balance. This balance is achieved by the plants and animals interacting with each other in non living surroundings. An example of a natural community is a woodland, and a woodland is usually dominated by a particular species of plant such as oak tree in an oakwood. The oak tree in this example is therefore called the dominant species but there are also many other types of plants, from algae growing on tree trunks and rocks. The plants of a community are the producers : They use carbon dioxide, oxygen, water and nitrogen to build up their tissues using energy in the form of sunlight. The plant tissues form food for the plant-eating

animals (carnivores). Thus plants produce the basic food supply for all the animals of a community. The animals themselves are the consumers and are either herbivores or carnivores.

Examples of herbivores in a woodland community are rabbits, deer, mice and snails, and insects such as aphids and caterpillars. The herbivores are sometimes eaten by the carnivores. Woodland carnivores are of all sizes from insects such as beetles and lacewings to animals such as owls, shrews and foxes. Some carnivores feed on herbivores, some feed on the smaller carnivores, while some feed on both : a tawny owl will eat beetles and shrews as well as voles and mice. These food relationships between the different members of the community are known as food chains. The links of the chain are formed by the herbivores that eat the plants and the carnivores that feed on the herbivores. There are more organisms at the base of a food chain than at the top ; for example, there are many more green plants than carnivores in a community.

### *Questions .*

Decide whether the following statements are true (T) or false (F) according to the text.

1. All the animals in a wood depend on plants for their food supply.
2. All the plants in a wood are eaten by animals.

4. Plants depend on the gases in the atmosphere to grow.
5. Some animals eat plant-eating animals and plants.

Hardly a week goes by without some advance in technology that would have seemed incredible 50 years ago. Over the past 20 years computers have completely revolutionized our lives. Yet we can expect the rate of change to accelerate rather than slow down within our lifetimes. The next 25 years will see as many changes as have been witnessed in the past 150. These developments in technology are bound to have a dramatic effect on the future of work. By 2010, new technology will have revolutionized communications. People will be transmitting messages down telephone lines that previously would have been sent by post. A

postal system which has essentially been the same since the Pharaohs will virtually disappear overnight. Once these changes are introduced, not only postmen but also clerks and secretaries will vanish in a paper - free society. All the routine tasks they perform will be carried on a tiny silicon chip. As soon as this technology is available, these people will be as obsolete as the horse and cart after the invention of the motor car. One change will make thousands, if not millions, redundant.

Even people in traditional professions, where expected knowledge has been the key, are unlikely to escape the effects of new technology. Instead of going to solicitor, you might go to a computer which is programmed with all the most up-to-date legal information. Indeed, you might even come up before a computer judge who would, in all probability, judge your case more fairly than a human counterpart. Doctors, too, will find that an electronic competitor will be able to carry out a much quicker and more accurate diagnosis and recommend more efficient courses of treatment.

In education, teachers will be largely replaced by teaching machines far more knowledgeable than any human being. What's more, most learning will take place in the home via video conferencing. Children will still go to school though, until another place is created where they can make friends and develop social skills through play.

*\* Choose the best answers to these questions.*

1. Changes :

- a. Occur daily
- b. Will deeply affect our lives
- c. Are dangerous to society
- d. Will take place five times faster than before

2. By 2010

- a. Postmen will have lost their jobs
  - b. Bookshops will have disappeared
  - c. People will no longer send letters
  - d. It will be cheaper to send messages
3. Which is not one of the writer's predictions ?
- a. Professionals won't escape change.
  - b. Doctors won't be as efficient as computers
  - c. Professionals will know less than today
  - d. Computers could make fairer judgements

Scientists understand how twins are born. Now , though, they are trying to explain how being half of a biological pair influences a twin's identity. They want to know why many identical twins make similar choices even when they don't live near each other. For example , Jim Springer and Jim Lewis are identical twins. They were separated when they were only four months old. The two Jims grew up in different families and 39 years, when they finally met , they discovered some surprising similarity between them . Both men were married twice . Their first wives were both named Catherine and second wives were both named Betty! Both twins named their first sons James blue Chevrolets , and had dogs named Toy. Are all facts coincidences, or biological?

Scientists want to know what influences personality . They study pairs of identical twins who grew up in different surroundings like Jim Springer and Jim Lewis. These twins help scientists understand the connection between environment and biology . Researchers at the University of Minnesota studied 350 sets of identical twins together. They discovered many similarities in their personalities. Scientists have discovered that personality

characteristics such as friendliness , shyness and fear are not a result of environment . These characteristics are inherited

Read the passage once. then read the following statements check whether they are true (T) or false(F) .

1. Jim Springer and Jim Lewis always lived together.
2. Identical twins who grow up together help scientists understand them better.
3. John and Buell Fuller were separated at birth and did not grow up together.

The smoke that comes from a lit cigarette contains many different poisonous chemical. In the past, scientists did not think that these chemicals could harm a nonsmoker's health. Recently, though, scientists changed their opinion after they studied a large group of nonsmokers. They discovered that even nonsmokers had unhealthy amount of these toxic chemicals in their bodies. As a matter of fact, almost all of us,breathe tobacco smoke at times, whether we realize it or not. For example, we cannot avoid smoke in restaurants, hotels, and other public places. Even though many public places have "nonsmoking is permitted". It is even harder for children to avoid secondhand smoke. In the United States , nine million children under the age of five live in homes with at least one smoker . Research shows that these children are sick more often than children who live in homes where non smokers live.

damaging effects of secondhand smoke on children also continue as they grow up . The children , of smokers are more than twice as likely to develop lung cancer when they are adults as children of nonsmokers . The risk is even higher among children who live in homes where both parents smoke.

Read the passage once. Then read the statement, Check whether they are true(T) or false (F).

1. Secondhand smoke is the smoke from other people's cigarettes.

2. People do not die from secondhand smoke.

3. Children of smokers are sick more often than children of nonsmokers are.

- c. Well, I'm sorry. I'm sure it isn't my fault it's already worn out.
- d. Worn out ? May I see it ?
- e. Can I help you, Madam ?
- g. And how long do you say you've had it ?
- h. Thank you. This is very strange. we've been selling this particular make for years and we haven't had any complaints in all that time.

- i. Yes, here you are. Look at the sleeves. They're the worst part. Do you see ? They've worn out very badly.
76. a. What ? You mean you're going to be late again ?
- b. Don't worry. You won't have to wait long. I'll be there at 8.
- c. I know... and it starts at 8.30. We'll just have to miss it this evening, that's all. We'll be able to see it some other time.
- d. Allo, is that you, Jim ? This is Julia. Look ... I'm afraid I won't be able to meet you at seven this evening. I'll have to come later.
- e. Now, listen, Jim, please. It isn't my fault. I'll have to work late this evening and then I'll have to go home. I can't possibly go to the restaurant straight from work !
- g. At 8 ? But we're going to see a film after dinner. Remember ?
- h. Oh. No, we won't ! Tonight's the last night !
- i. It's always something, isn't it ? When will you be able to come, then ?
77. a. I'm afraid there's something wrong with the car. I've just noticed that it's been using a lot of petrol lately ; far more than usual.
- b. I certainly hope not. I want to use the car this evening. Do you think I'll be able to ? I mean, will it be ready by then ?
- c. Around 5 ? Alright.
- d. I suppose I'll have to. Do you think it might be something serious ?
- e. Good morning, Mrs. Rogers. What can we do for you ?
- g. It might be. It all depends on what the trouble is. Do you think you could give us a ring a round 5 ? We'll know by then.
- h. Oh, well, we'd better have a look at it, then, hadn't we ? Can you leave the car with us now ?

- i. I shouldn't think so. You never know, of course. It might be the engine.
78. a. Oh, good. Would you look at my watch ? It's stopped.  
 b. Good. When will it be ready ?  
 c. Excuse me. Do you do watch-repair ?  
 d. Only yesterday. Can you do anything about it ?  
 e. This time next week. No, you'll need a receipt.  
 g. Yes, we do, madam.

 e. Your alarm clock ? But you told me yesterday that the bus had broken down !  
 g. Headache ? Only last week you said you had with your stomach !  
 h. And you often come to college late as well. Yesterday for instance, you ...

### **Exercise 1.**

Read the story and translate "from along time ago..." to "...him try " into Vietnamese.

### **The boy with the best idea**

A long, long time ago a man with an elephant came to a village. This was the first time the people of the village had seen an elephant, and they wanted to know the weight of the elephant. But everybody had different ideas about it. Each of them said that he was right and the others were wrong.

They tried to think of a plan by which they could know how much the elephant weighed. But they could not find any.

Then a boy said, "I have a plan and I can tell you how much the elephant weighs" ; please let me try it.

The people of the village did not want to listen to the boy." How can he find a plan when we, old people, can not ?" they said. But they decided to let him try.

The boy first told them to put the elephant in a big boat. The boy then made a mark on the side of the boat where the water reached. Then he told them to take the elephant out of the boat, and the boat rose in the water.

After that, he collected some large stones and told the people to put them in the boat. The boat began to go down again till at last the water came up to the mark on the side. This showed that the stones in the boat were of the same weight as the elephant.

It was then very easy to weigh the stones. So the people knew how much the elephant weighed.

*Read the passage and translate it into Vietnamese*

Over the past few years relations between Vietnam and member countries of the Association of Southeast Asian Nations (ASEAN) have improved notably. (ASEAN members are Brunei, Indonesia, the Philippines, Singapore and Thailand.) The Vietnamese Prime Minister, Vo Van Kiet, has visited all six countries, and the General Secretary, Do Muoi, has visited Singapore and Thailand. In the past few months a number of heads of governments from ASEAN have reciprocated, arriving in Vietnam on goodwill visits, and to discuss government business and the signing of a number of important agreements, including some major joint-venture contracts.

The ASEAN Secretary-General, Ajit Singh, arrived in Hanoi in late February for talks with Vietnam's Foreign Minister, Nguyen Manh Cam, to determine the appropriate timetable for Vietnam to become a full member of ASEAN. Vietnam now has observer status in ASEAN, which has allowed it to be present at ASEAN ministerial meetings over the past two years. ASEAN ministers will probably consider Vietnam's membership when they meet later in July to discuss regional security.

### *Exercise 3.*

*Read the passage and translate from "In the past..." to "area farmers" into Vietnamese.*

In the past few years, the International Centre For Tropical Agriculture in the Coli Colombia has been working to help small farmers. The centre known as CIAS has trained 58 people to help in development of local seed industry in Central America and South America. Ario Garai is head of the Seed Unit at CIAS. He said that scientists have developed improved crops that fit people in developing countries. But he said the small village farmers can not get the seed. Large Seed Company can not earn enough money supplying seed for village farmers, so these farmers have to plant the same seed their fathers and grandfathers planted, or they buy whatever they can find at the local market. They are often not sure what kind of seed they are getting there. Researchers decided they will train the farmers to provide their own seed. The program has a cooperative effort. It involves farmers, NGOs, and National Groups. They test, choose, and market their seed, they take the best seed from their own crops and supply them to other farmers in immediate areas. For example, 8 years ago, 23 farmers joined together in South Colombia. In the first year, they produced 8,000 kilograms of seed for area farmers. Now they supply more than 30,000 kilograms of seed each year. In Sutoludit Guatemala, farmers plant 36,000 kilograms of seed each year, the seed come from a group of 42 local farmers. These are not given way program, the cooperative farming groups sell their seed and they earn good prices because their seed produces good crops. Farmers in villages involved in the project no longer have to take chances when they buy seed. they can get best seed for local growing conditions. The seed comes from both local and imported plants. Farmers trained by the International Centre For Tropical Agriculture earn money and learn how to improve seed production. Because of the CIAS efforts, many other farmers in Central and South American now can get seed to produce much better crops.

#### Exercise 4.

*Read the passage and translate from "Lately..." to "for parties"*

### Halloween

Lately, I've been wishing I were back home. Today is October 31st. It's Halloween in the United States ! Halloween is my favourite holiday of the year. But, here I am ,three thousand miles away from New York City-my city.

My name is Mark, and I am an art student in Italy . I have been living and studying in Italy for almost a year. I usually enjoy being in Italy ,but today I have been feeling very homesick .I am missing all the fun back home in the United States.

On Halloween, people really have a good time .Children dress up in all different kinds of costumes. They go to neighbours houses and say," Trick or treat". The neighbours give them a "treat"-usually candy, apples, or pennies . A lot of adults enjoy wearing customs, too. They often put them on for parties .

In New York City, where I come from, there is a Halloween parade. This parade has been taking place every year since 1970 in New York City's Greenwich Village, an area, traditionally, many artists have lived and worked. People dress up in all sorts of wonderful, creative, funny costumes and join the parade. Sometimes, two or three people wear one costume together. One year, I saw several people dressed up as one huge, pink elephant !Many people spend a lot of time planning and making their costumes. I miss seeing all the people marching through the Greenwich Village streets and along Fifth Avenue in their costumes. Traditionally , the most popular disguises on Halloween were no longer ,a long time ago, people believed that the spirits of the dead <sup>came back</sup> walked the earth on October 31st. Halloween was originally a religious holiday that began in Ireland and Scotland in the year 1,000 BC. First, it was a Celtic holiday, and later, a Christian one.

Nowadays, in the United States, Halloween no longer has a religious meaning for most people. Americans have been

celebrating Halloween for over one hundred years, ever since the Irish and Scottish settlers brought their traditions with them. The majority of Americans do not know much about the history of the holiday. For most people, Halloween is just a day to have a lot of fun and go a little bit crazy.

If I were back home in New York now, I'd put on a wild costume and go to Halloween parade. But the fact is that I am here in Florence, Italy. So I won't put on costume, but I will do a painting of Halloween in New York. In this way, I can share my favourite holiday with my Italian friends.

### *Exercise 5.*

*Read the passage and translate from "Football..." to "...at university" into Vietnamese.*

Football is a very old game. The ancient Romans, Chinese and Mexicans all played games where men kicked a ball. For the Romans it was a war game, in which two teams of soldiers would use whatever force was necessary to get the ball across either of two defended lines. The Roman Empire has long since vanished, but the violent pastime of legionaries has continued – and can still be quite violent !

In the Middle Ages, some kind of football was popular in Italy, France, England and Scotland, but it was such a dangerous game that kings actually banned it, and for 300 years it suffered greatly from official disapproval. Nevertheless, in 1613, King James VI of Scotland and I of England permitted himself to be entertained in an English village with "music and football match", and, a few years later, the English dictator Oliver Cromwell played football when he was at university.

By the end of the 18th century, however, the game was in real danger of dying out in Western Europe. Curiously enough, it was the English "public" school that saved it from extinction. The rich young men at these schools (which were in fact private rather than public) had nowhere to hunt, fish, ride or otherwise use up their

energies ; all they could do outside school hours was kick a ball in the schools' open spaces. They played the game that kings had banned, and each school slowly began to evolve its own special style and rules.

In 1863, the Football Association approved a game that outlawed carrying and kept the ball at men's feet. The game still had a long way to go, however, before it would be the soccer watched by millions around the world on television during the World Cup. Whole teams would rush back and forward on the field with ball kept close at their feet ; there were no passes or long kicks, and some of the rules used in those days were still nearer rugby than soccer. By the early 1870s, however, the fast exciting and open game of modern Association football was beginning to appear. The goal became standard, with a hard crossbar instead of a long piece of tape, and the goal-keeper was given his own personal set of rules. In the process, soccer changed irrevocably from gentleman's weekend exercise to the greatest spectator sport in the history of the human race.

#### *Exercise 6.*

*Read the passage and translate it into Vietnamese.*

Recently the World Health Organization announced that the disease of smallpox has almost been wiped out in most parts of the world, thanks to widespread vaccination. Most people are vaccinated at least once in their lives and if they wish to travel from one country to another they must be able to show a certificate proving that they have had a recent vaccination. In this way the disease has been prevented from spreading and today one seldom hears of it at all.

This is mainly due to the remarkable discovery made by a country doctor, Edward Jenner, in about 1798 when he published an account of his experiments in a new method called "vaccination" (from Latin word "vacca" meaning a cow). Jenner discovered that

people who worked with cattle, like milkmaids and cowmen, were often infected with a harmless disease called cowpox which they caught from the cattle ; but these people never seemed to get smallpox. So he experimented by making a scratch on arms which became sore for a day or two, they soon healed and none of these people ever got smallpox.

Soon the news of the wonderful discovery spread abroad and people rushed to their doctors to be vaccinated. In America, at Gibraltar, in Spain, Egypt and China the simple scratch of the arms was performed on thousands of people, and the terrible smallpox began to disappear.

*Read the passage and translate from "Two years..." to "... of the family" into Vietnamese.*

Two years ago, the Vietnamese papillar pig became a popular family pet in US. The pig was known to be tiny. Report said that a grown Vietnamese papillar pig will weigh no more than 2.7 kgs. The report also said the pig was very gentle and could live inside the house. Many people bought one. Today there are more than 20,000 pigs in the country. But the World Trip Journal Newspaper explains that is more than a story :

Aitomans lives in eastern state of Cansoveinia. Two years ago, she bought a pig from a company in Middle western state. Mrs Aitomans paid \$1,200 for it. When the pig arrived at her house, it weighed only a little more than 2 kilograms. The new owner named the tiny animal Amaly. She kept it in a bed, normally used for baby. But Amaly soon started to grow. In less than a year and a half she weighed more than 56 kilograms( ! ) and she was no more gentle. Aitomans said the pig began attacking her. When she intended to wash the pig, it moved so fast that Ms. Aitomans was fallen. Amaly now weighs 79 kilograms. Mrs Aitomans phoned the company that sold pigs to protest and she called for claim its public

about the pig. But she can not say goodbye to Amaly because the pig is like a member of the family.

Jim Reddy is a church leader in western Texas. He bought a papillar pig, too. But Mr. Reddy knew that he made a mistake soon after he bought it. The pig made a mess throughout the house. It damaged property and it made noise like a farm pig. Mr Reddy returned his new pet a few days later.

Jenny Winslow is met in California. Her one tiny pig Ketches now weighs 136 kgs. Ms Winslow said she tried reducing the amount of food she gave Ketches, but Ketches protested by running around the house, making a lot of noise so Ms Winslow said she again is giving Ketches what she likes to eat. The pig eats butter, icecream, and anything she wants.

#### **Talks on Cambodian border disputes**

The Prime Minister, Vo Van Kiet, visited Cambodia's co-Prime Minister, Prince Norodom Ranariddh and Hun Sen, concerning bilateral problems. These talks followed a visit to Cambodia by Vietnam's Foreign Minister in February. At the heart of the border disputes between the two countries is a treaty signed in 1980 and valid for 20 years. The treaty outlines, for example, cooperation over borders and crossborder trade but since Vietnam withdrew from its occupation of Cambodia in 1989, almost a decade after the treaty was signed, border disagreements, as well as hostilities mounted against the Vietnamese living in Cambodia, have escalated.

The two countries agreed during the April talks to set up a technical committee to demarcate their common border, and may appoint a technical group to deal with the problem of Vietnamese immigrants in Cambodia. It is estimated that some 5,000 Vietnamese have taken refuge on the border and are waiting to

return to their houses around Tonle Sap Lake after fleeing from attacks by the Khmer Rouge in the run-up to the national elections in Cambodia in May 1993. But despite these advances, violence continues : in less than a week after the Vietnamese Prime Minister's visit to Cambodia, 12 ethnic Vietnamese were murdered and another 23 injured in a gun and grenade massacre south-east of Phnom Penh. The recent carnage is the worst in Cambodia since the series of bloody pogroms instigated by the Khmer Rouge last year, when more than 100 ethnic Vietnamese were killed in the run-up to the national elections. The recent build-up in the strength of the Khmer Rouge may bode ill for ethnic Vietnamese in Cambodia.

*Read the passage and translate from "Any object..." to "...of money " into Vietnamese.*

Any object that is used as money may be called commodity money. But in order to understand a money object more clearly, we should ask, 'What was it used for ? If we answer this question, we will discover the function or purpose of the money object.

Nowadays the uses of money are mostly economic. There are four economic functions which are usually given in the beginnings of elementary textbooks on banking or commerce. But in the past the use of money was not limited to these four economic functions. There were other equally important functions which were social, religious, magical or simply decorative. Sometimes the economic function was specialised and restricted to buying slaves or paying the bride price. We should try to understand those people and their money objects as they were, and not from the point of view of modern economic functions of money.

In addition to the functions of money, we should look at its qualities. What were the various forms of money like ? Were they light ? heavy ? countable ? decorative ? beautiful ? useful ? portable ? hard to get ? Perhaps they combined some of these

qualities. But one thing is certain. They were fully acceptable as payment which could be used to make further payments, otherwise they could not be called money.

Finally, it is of interest to note the country of origin of the money and the extent of the area where it was acceptable. Was it special-purpose local money ? Or was it general-purpose regional money ?

## **Victory Day**

The Great Patriotic War ended in May, 1945. That spring day of May 9 went down in the history of our country as Victory Day. It is celebrated by meetings and marches. People bring flowers to the monuments where war heroes lie. War veterans tell young people how they fought during the war to defend their socialist country.

Victory was won at a high price. The Soviet people had to fight against the fascists from the White Sea in the north to the Black Sea in the south. They defended Moscow and Volgograd and thousands of other towns and villages. They helped the people of many other countries to become free from fascism. The heroic Soviet people not only defended their own country, but they saved the world.

But Victory Day is not only a day to remember those who did not come back from the war. It is a day to be proud of all progressive people who took an active part in winning the victory over the fascists and helped the Soviet Army.

At the same time, on Victory Day we not only remember the past. We must think about the future and defend peace. The Soviet peace programme calls all people of the world to fight actively against war.

*Read the passage and translate from the beginning to "extravaganzas" into Vietnamese.*

For the first half of the 20th century the cinema dominated all other forms of popular entertainment in the world. During the heyday of the 'movie theatre' or the 'picture house' – as the Americans and British variously called their cinema halls – millions of people throughout the world developed the habit (almost the addiction) of going to see a film at least once a week. This was the golden age of Hollywood, film capital of both the United States and the world.

The first silent films (in black and white, of course) were shown during the 1890s as part of music-hall entertainment, taking turns along with various live acts such as singers, dancers, and magicians. Such films were simply to give the audience a thrill; the vision of a huge locomotive racing towards you out of the screen usually produced the effect that both the promoter and the audience desired. Indeed, this thrill element continues to be very significant in movies, as is witnessed by the demand for more and more spectacular 'special effects' in various science-fiction extravaganzas.

A Frenchman, Georges Melies, created the first actual story-related movies around 1900 and the first American story film was *The Great Train Robbery* in 1903. From then until 1914, American and European film-makers were more or less equal, but after the outbreak of the First World War Europeans had other more pressing concerns, and far away in California, near the city of Los Angeles, the film-makers of the New World went ahead on their own, producing first the talkies and then technicolor. Many European countries (including France, Britain, Russia and Germany) have continued to make films, but they have never really managed to catch up with the lead that Hollywood established during and after the Great War.

The only nation that can nowadays be said to rival the United States in the volume of films produced, money made and numbers entertained is India, which has an extremely successful home and export business in films ; it makes movies available both to Indian communities established in other parts of the world and to countries whose people are culturally closer to Bombay than to Hollywood.

### **Edinburgh**

Edinburgh is the Capital of Scotland and one of the most beautiful cities in Europe. It lies on seven hills and goes down those hills to the sea. The highest hill is three hundred metres above the sea. From the street in the centre of the city you can see ships coming to Edinburgh from different countries of the world.

In the "old town" the streets are narrow. The tall houses with narrow windows go up the hills to Edinburgh castle which is one thousand years old. The modern town lies at the foot of the hills. The streets here are straight and well planned, so it is easy to walk in the city when you go sightseeing in Edinburgh. People say that only two cities in the world are so well planned – Edinburgh and Leningrad.

Many great men have lived and worked in Edinburgh. Robert Burns, the great Scottish poet, published his first book of poems in Edinburgh. There is a monument to him in the city.

Walter Scott, the father of historical novel in the world literature, was born in Edinburgh. The monument to Walter Scott is in the main street of the city.

Robert Louis Stevenson, a famous English writer, was born and lived in Edinburgh. He loved the city and wrote about it in his best novels. \* \* \* \* \*

### *Exercise 13.*

*Read the passage and translate it into Vietnamese.*

The weather is something no one can control ; It affects everyone, rich or poor, young or old in every part of the world. Maybe that is why there are so many expressions about the weather, especially about rain. Sometimes when you need rain, you do not get any. Other times you get rain when you do not want it. Take a baseball game for example, a sudden rain storm can halt an exciting game sending the players and the 20,000 persons watching the game running or cover. If the game does not continue, people who bought tickets are given rain checks. There are special tickets that will let them see a later game for free. Rain check now means a second chance of something. Often a rain check has nothing to do with rain. Stores may offer rain checks when they sell all of a product, a television set, for example, at a special low price. After all TV sets are gone, the store gives rain checks to people who wanted to buy one. The rain check allows a person to buy the TV set later at the same low price after the store receives more from the factory. Rain check is also used in social situations. It is a way of accepting an invitation but for a time. You may ask for a rain check if you are invited to a friend's house for dinner, but cannot be there. You say " I'd love to join you for dinner but I'm busy. Could I have a rain check ? " You are asking in other words if you could join your friend for dinner at another time.

### *Exercise 14.*

*Read the passage and translate from "An Indian ..." to "...and trains" into Vietnamese.*

#### **Food Transportation**

An Indian boy ran swiftly from a village in Mexico. In his hand he carried a basket of fish. Only a few moments before, they had been pulled from the cold water of the lake. Farther on, another runner was waiting to take the basket from the tired boy and race

on. And so from one swift runner to another, fresh fish were rushed from the lake to the dinner table of Montezuma, ruler of Aztecs.

Speed is important in transporting fish and many other fresh foods. Foods that spoil easily must reach the market and the dinner table as quickly as possible. But now fast trucks, trains, ships, and planes can replace runners.

Planes are the fastest way to carry food. They are especially useful in carrying food to people and animals that could not be reached otherwise. Suppose there were a flood or an earthquake and the people could not be reached by trains or trucks. Then packages of food could be dropped from planes to save them from starvation.

But air transportation is usually the most expensive way of carrying food. And so within a country most perishable foods—foods that spoil easily — are carried by trucks and trains.

Trucks have many advantages. A truck can start as soon as it is loaded, and it can deliver goods direct to the market. Many modern trucks have their own refrigeration systems. Today the tank truck that carries milk is a familiar sight on many country roads. The farmer no longer sets his milk cans by the side of the road to be taken to town by horse and wagon. Instead, a modern cooled tank truck drives up to the farm several times a week. The milk from the farmers cooling tank flows through a pipe into truck. There it keeps cool and sweet until it is delivered to stores and homes.

Trains cannot always carry food as quickly as trucks. Many cars must be loaded before a train can start on a trip. And when the train arrives in the city, the food must be unloaded from the cars onto trucks to be taken to the market. All of this takes time. When railroad companies wanted to move perishable foods faster, they developed a plan that works like this : refrigerated trailers are put in flat cars that run on the rails. When the train arrives at the

city, the trailers are unloaded and attached to trucks. Some companies now have truck and freight-car combinations.

**Solar Energy Systems**

The basic purpose of any solar energy system is to collect solar radiation and convert it into useful thermal energy. System performance depends on several factors, including availability of solar energy, the ambient air temperature, the characteristics of the energy requirement, and especially the thermal characteristics of the solar system itself. Solar collection systems for heating or cooling are usually classified as passive or active. Passive systems collect and distribute solar energy without the use of an auxiliary energy source. They depend upon the building design and the thermal characteristics of the materials used.

Active systems, on the other hand, consist of components which are to a large extent independent of the building design and often require an auxiliary energy source for transporting the solar energy collected to its point of use. Active systems are more easily applied to existing buildings.

**Exercise 16.**

*Read the passage and translate from the beginning to " ...in an ecosystem ".*

**Ecosystem**

An ecosystem consists of a number of living organisms and their physical environment. The living organisms and their non-living environment are interrelated and interact with each other. There is a flow of energy from the non-living organisms to the living organisms. There are a number of materials cycles - that is exchanges of materials between living and non-living parts. When we study an ecosystem we can therefore analyse its components

(the structure of the ecosystem) and we can analyse its processes (the functions in the ecosystem).

There are six major components in an ecosystem.

1. Inorganic substances such as carbon, nitrogen, oxygen, water, carbon dioxide, etc.

2. Organic compounds such as proteins, carbonhydrates etc. The organic and inorganic substances in an ecosystem regulate the work of the whole system.

3. Climate and other physical factors. Temperature, wind, light and rain are important physical factors. They affect all the processes in an ecosystem.

4. Producers. Only green plants are able to manufacture food from simple inorganic substances. In the process known as photosynthesis, green plants in the light of the sun combine carbon dioxide and water and produce carbonhydrates.

5. Consumers. Consumers obtain their energy from green plants. Herbivores, such as cows and sheep, eat green plants but do not eat other animals. They are called primary consumers. Carnivores, such as dogs and cats, feed on other animals and are called secondary consumers.

6. Decomposers, such as bacteria and fungi. Decomposers break down the tissues and excretions of other organisms. Bacteria break down the flesh of dead animals. Fungi break down plant material. They enable chemical substances to return to the physical environment.

#### **English**

Today, when English is one of the major languages in the world, it requires an effort of the imagination to realize that this is a

relatively recent thing that in Shakespeare's time, for example, only a few million people spoke English, and the language was not thought to be very important by the other nations of Europe, and was unknown to the rest of the world.

English has become a world language because of its establishment as a mother tongue outside England, in all the continents of the world. This exporting of English began in the seventeenth century, with the first settlements in North America. Above all, it is the great growth of population in the United States, assisted by massive immigration in the nineteenth and twentieth centuries, that has given the English language its present standing in the world.

People who speak English fall into one of three groups : those who have learned it as their native language ; those who have learned it as a second language in a society that is mainly bilingual ; and those who are forced to use it for a practical purpose administrative, professional or educational. One person in seven of the world's entire population belongs to one of these three groups. Incredibly enough, 75% of the world's mail and 60% of the world's telephone calls are in English.

### *Exercise 18.*

*Read the passage and translate from "An ecosystem..." to "...in the forest" into Vietnamese.*

### **Development and Evolution**

An ecosystem exists in a state of equilibrium. It can support a ~~certain~~ number of plants and animals of different species. When the population of one animal increases, there will be a change in the ecosystem. There will not be enough food and water for all the animals. Consequently, some will die. The system will return to its state of equilibrium. The ecosystem regulates itself in the same way as a thermostat regulates the temperature in a heating system.

Ecosystems are not static - they change all the time. Plants and animals are able to adapt to changes in the physical environment

is possible to predict changes. For example, when fire destroys the vegetation in a region, there will be certain changes. First grass and some flowers will grow. Then insects will appear. The wind will blow the seeds of small trees. These trees will grow and birds will appear. As the trees grow, the grass will disappear and a dense forest will develop. Some trees cannot live in a dense forest and will die. Other trees will develop and a community of birds and animals will live in the forest.

During long periods of time ecosystems evolve. The evolution of an ecosystem is caused by factors inside and outside it. Consider the evolution of the atmosphere. When life began on earth, the atmosphere contained nitrogen, hydrogen and other gases but no oxygen. There was no ozone in the atmosphere. Consequently, the sun's rays prevented life from developing on land. The first living organisms developed under the sea. After the evolution of photosynthesis, the oxygen in the atmosphere increased and life expanded. Complex living organisms developed. As the oxygen in the atmosphere increased, a layer of ozone was formed. Life was then possible on the surface of the earth. Life on earth depends on the equilibrium of the atmosphere. There is now a danger that man-made pollution will destroy the equilibrium.

### **London**

London is the British capital and one of the biggest cities in the world.

The oldest part of London is called the City. It is small, but it is very important. Two thousand years ago a town was built here. For hundred of years people lived and worked there, but now many of the old houses have gone. Thousands of people come here every morning to work in large offices.

To the east is the large area called the East End. This is London's poorest part, where people of all colours live. The very

large riverside docks in the East End make London one of the three largest ports in the world.

To the west are the fine shops and theatres of the area known as West End. This part is best known to rich tourists. Oxford Street with its great department stores is the favourite street for shopping. In the West End there are beautiful parks, too. The largest of all London's parks is Hyde Park.

The Houses of Parliament are along the bank of the Thames river and Parliament Square is one of many London squares. Some of them are small, others are large and busy, like Trafalgar Square.

Britain forms the greater part of the British Isles, which lie off the north-west coast of mainland Europe. Its area is 242,400 square km(93,600 sq miles), half the size of France. Its weather is changeable, but there are few extremes of temperature, Britain is a major world producer of oil, natural gas and coal. Since 1980 it has been self-sufficient in energy in net terms.

With 57 million people Britain ranks sixteenth in the world in term of population. England, Wales, Scotland and Northern Ireland, its four component lands, have separate traditions and cultures. Over the centuries immigrants and political refugees from Europe have added their own customs to these. More recently people from Caribbean and South Asian subcontinent, Cypriots, Chinese and others have contributed to the multiracial nature of British society.

Britain has for centuries lived by its people's enterprise and the advancement of its overseas trade. It was the world's first industrialised country. While manufacturing continues to play a vital role, recent decades have generally seen a faster growth in the services sector. Government policies seek to stimulate enterprise and encourage wealth creation and competition.

The national infrastructure benefits from a network of motorways, fast inter-city rail services and the recent expansion of airports. Revitalisation of inner cities and housing estates includes initiatives to encourage enterprise, employment and education. Reforms are in train to shape Britain's wide-ranging social welfare system for the 1990s.

**Electric Protection Devices**

This term refers to a particular type of equipment applied to electric power systems to detect abnormal conditions and to initiate appropriate action to correct the abnormal condition. From time to time, disturbances in the normal operation of electric power systems occur. These may be caused by natural phenomena, such as lightning, wind, or snow ; by accidental means traceable to reckless drivers, in the system itself, such as switching surges, load swings, or equipment failure.

Protective devices must therefore be installed on a power system to ensure continuity of electric service, to prevent injury to personnel, and to limit damage to equipment when abnormal situations develop. Application of these devices varies widely since they are applied commensurately with the degree of protection required.

**Exercise 22.**

*Read the passage and translate from " Plants..." to "...soil " into Vietnamese.*

Plants and animals interact with each other. Animals depend on plants for their food. In the same way, plants depend on animals. All plants and animals must have four elements : carbon, nitrogen, hydrogen and oxygen. These elements are combined to form proteins, fats and carbonhydrates in the animal and plant. They are then used for building cells and tissues or as a source of

energy. Oxygen is obtained from air and water. Water is also a source of hydrogen for living things. Carbon and nitrogen come from the air, sea or soil.

The use of these four elements by plants and animals involves complex cycles demonstrate the dependence of animals and plants on each other.

In the nitrogen cycle, nitrates are absorbed from soil by plants. The nitrates are used to make proteins. Plants are eaten by animals. When plants and animals die, bacteria in the soil cause decomposition. As the dead plant or animal is decomposed, the tissues are converted to nitrates. In this way, the nitrates are returned to soil.

With the price of a small home computer now as low as 50 pounds, experts predict that before long all schools and businesses and most families in the richer parts of the world will own a computer of some kind. Among the general public, computers arouse strong feelings—people either love them or hate them.

The computer-lovers talk about how useful computers can be in business, in education and in the home—apart from all the games, you can do your accounts on them, learn languages from them, write letters on them, use them to control your central heating, and in some places even do your shopping with them. Computers, they say, will also bring more leisure as more and more unpleasant jobs are taken over by computerised robots.

The haters, on the other hand, argue that computers bring not leisure but unemployment. They worry, too, that people who spend all their time talking to computers will forget how to talk to each other. And anyway, they ask, what's wrong with going shopping, using pens and paper and typewriters, and learning languages in

classrooms with real teachers ? But their biggest fear is that computers may eventually take over from human beings altogether.

And so the arguments continue. Have you decided which side you're on ?

The original Ulysses was an ancient Greek hero, but Maclean's Ulysses is a ship.

The novel entitled HMS Ulysses is about men, ships and war in the awful conditions of the North Atlantic, and does not have a happy ending. If you like happy endings, this is just not the book for you. The action takes place during the Second World War and centres on the Ulysses, just one ship among the many ships that guarded the Allied supply lines in the North Atlantic. Its story suggests that war is pointless and wasteful, destroying good men and good ships to no purpose.

Maclean describes how the Ulysses and her sailors die in the ice, fire and water at the top of the world, attacked by both human and natural enemies during a terrible northern winter. At the end of the book, he describes how the warship went on through terrific seas, covered with ice and badly damaged, but still moving at great speed. Then her magazine blew up, blowing a great hole in her bows, so that the sea rushed in. She drove herself onward and downward into the rolling waters, to the black floor of the Arctic, her great engines still turning and took every man with her.

### **Abraham Lincoln (1809 – 1865)**

Abraham Lincoln was born on a farm. His father was a poor farmer and the boy had to work much on their small farm. The

young Abe spent less than a year at school. But he read a lot."The things I want to know are in books ", he said.

One day Abraham bought a book about laws of England. He studied it every day, and his interest in law grew. He became a lawyer. His life became interesting and useful. He knew how he could help people, he tried to use the law to defend them.

In 1846 Lincoln was elected to Congress. There he said that he was against slavery. He said that the black slaves of America must be free. He thought of a free country for all people.

Lincoln became very popular. In 1860 he was elected President of the United States of America. His ideas about freedom for the black slaves were good for the rich people of the industrial North. The planters of South who exploited those slaves were against them. So war between the North and the South began. It was won by the North.

In 1864 Abraham Lincoln was elected President again. But his enemies, who wanted to exploit the black slaves as before, could not let Lincoln continue his good work. A year later he was killed in a theatre in Washington.

Abraham Lincoln's traditions live in the struggle of all progressive people in the USA.

*Read the passage and translate from "Probably..." to ".... of your kitchen " into Vietnamese.*

Over the last fifty years housework has been made considerably easier by the invention of an increasing number of labour-saving devices and appliances, mostly electrical, which have drastically cut down the amount of time and effort previously needed to do the everyday household chores. For many years now there have been vacuum cleaners, electric irons, washing machines and floor-polishers ; now we have electric potato-peelers and even electric carving knives. We can buy cookers that will switch

hemselves on and produce a meal that is ready to eat the minute we get back home. If we have one of those electric pop-up toasters, we can make toast at the breakfast table itself. Mashed potatoes can be quickly and effortlessly made with a mixer, which usually has a variety of attachments that enable you to make all sorts of other more exotic things like fresh orange juice or real mayonnaise. And a tumble-drier can save you from the frustration of hanging out the washing only to have to bring it in again ten minutes later when menacing storm-clouds loom over.

Probably the most important piece of electrical equipment to become widely used in the last twenty years is the dishwasher. Washing up by hand is not only a time-consuming task (it can take longer than eating the meal itself), but also an extremely boring one, particularly when you are on your own, and it also ruins your hands. Dishwashers come in a range of different sizes and models to suit your purse, the size of your family, and the layout of your kitchen. They can be stood on the floor or on a worktop, or they can be mounted on a wall. And their capacity ranges from six to twenty place-settings. If you buy one, it is worth having it plumbed into the mains water supply to save you having to connect rubber pipes to your taps each time you use it. All you have to do is load the dirty dishes, glasses and cutlery into racks inside the machine, pour in some special detergent powder, close the door and switch it on ; it does the rest by itself while you get on and do more interesting things. Of course, most dishwashers can't accommodate large saucepans and frying pans, and you do have to scrape all scraps of solid food from the dishes before you put them in to avoid blocking the filters, but the machine will wash almost everything else and get rid of even the most stubborn egg and lipstick stains. When the washing cycle is over, the machine dries the plates and glasses with its own heat, and indeed they can be left inside until they are needed for the next meal.

A national political struggle is continuing over the issue of protection for the remnants of vast ancient forests that once covered the northwestern areas of the United States. These old forests, called "Old growth ", contain trees from 200 to 1200 years old. There are now about 6 million acres of virgin forest in Washington and Oregon, only about one-tenth of what existed before the 1800s. This old growth contains some of the most valuable timber in the nation, but its economic worth is also contained in its water, wildlife, scenery, and recreational facilities.

Conservationists want the majority of existing old growth protected from harvesting. They emphasize the vital relationship between old growth and the health of the forest's ecosystems. They cite studies which show that both downed and standing old trees store and release nutrients necessary to younger trees.

On the other hand, much of the Northwest's economy is developed around the logging industry. Trees are cut down to make wood products, and many mills are geared for old-growth industry. In recent years 500 acres of old growth have been logged, including trees up to 500 years old and eight feet in diameter. While the U.S. Forest service wrestles with the problem of how much of the forest to save, the harvesting of timber continues. The district office refuses to remove any of the old growth from timber production. The struggle is continuing at the national level with strong proponents on both sides.

Banking, finance, insurance, business services and leasing account for 11 per cent of the British economy's total output. London has the world's largest insurance market, and its banks

are responsible for about a fifth of international bank lending. London is the world's principal trading centre for commodities as well as an increasingly important centre for financial future markets.

The bank of England oversees the soundness of the financial system as a whole executes monetary policy acts as banker to the government and provides banking facilities for the banking system. Retail banks provide financial services to individuals and companies particularly account and loan facilities. They also offer home loans.

Some 126 building societies take deposits from individuals (on which they pay interest) and arrange mortgages for house purchase. They also offer a wide range of banking and insurance services.

The International Stock Exchange is one of the world's largest markets for government and company securities. Its turnover of equities in 1989 accounted for some 10 per cent of equity trading worldwide. Also in London are various commodity markets, the bullion market, the Baltic Exchange for shipping and agricultural futures, and Lloyd's for insurance.

Of course, you know the name of William Shakespeare very well. he was one of the world's greatest writers. He was born in Straford-On-Avon, a small English town. The Straford school was a difficult place at that time. The pupils had to be at school at six in the morning in the warm seasons and an hour later in the winter. School-days were long, and only in the holidays could William Shakespeare have ■ real rest. He went to the woods and to the river Avon.

But the best thing of all in Will's life were groups of actors who visited Straford from time to time. He watched them and knew that he wanted to be an actor. When William was twenty-one, he went to London. He became an actor there and later he began to write plays. Shakespeare watched the new life and he showed how differently people understood it. Life itself was shown in his plays. Shakespeare's heroes are still on the stage. We go to the theatre or cinema to meet them again and again.

William Shakespeare's four hundredth birthday was celebrated in 1964 all over the world. A beautiful Soviet stamp of that year shows his portrait and scenes from Romeo and Juliet.

*Read and translate the passage from "The priority..." to "...Christmas atmosphere"*

The priority of feast days has varied over the centuries, but Christmas, Easter and Midsummer have retained their position as main festivities of the year. Christmas, coinciding with the darkest part of the long Finnish winter, is a holiday which centres on the family and the home. At about midday on Christmas Eve, 'Christmas Peace' is declared over all Finland from the country's former capital, Turku. This ritual, based on Medieval laws, lost its legal import centuries ago, but lives on as a ceremonial  $\pm$ opening $\geq$  of the Christmas season. A Christmas sauna is an important feature of Christmas Eve celebration. At dusk, people light candles on their family graves. Families then gather together for main Christmas meal on Christmas Eve. The high point of the evening is the visit of Father Christmas, who brings the Christmas presents with him in person. Candles and the traditional Christmas decorations made from straw help to achieve the traditional Christmas atmosphere.

The urban Christmas is an entertaining mixture of children's plays, charity, commerce, worship, family holiday and peasant customs. Christian traditions have been interwoven with the secular aspect of Christmas. For instance, attending the Christmas service has become a tradition in many families, although more likely for nostalgic reasons than to hear the Christmas message.

### Exercise 32.

*Read the passage and translate from the beginning to "...in the box".*

An organisation in the Philippines has developed a new device to make chicken-raising faster and easier. The organisation is the Institute for Small-Scale Industries. It is a study and training centre, part of the University of the Philippines. The device it has

made is an incubator that keeps chicken eggs warm and safe while baby chickens are developing inside them.

The incubator is easy to make. It uses materials found in almost any village. Here's how to built it. First, find two boxes made of paper cardboard. One box should be about half a metre long, a little less than half a metre wide, and about thirty centimetres tall. The other box should have the same shape but be a little smaller in each direction. You should be able to put the smaller box inside the larger one and have a little extra space on all sides. Next, gather some old newspapers, crush the pieces of paper into balls and place the paper balls in the bottom of the big box about five centimetres deep. Now place the smaller box on top of the paper balls. So that it is in the centre of big box resting on the paper. Crush some other pieces of paper, and place these all around the outside of the smaller box. This paper separate the big box from the small box. You may want to use some pieces of wood to hold everything together. Then make a cardboard cover that fits tightly on the big box. Next you build a heat source. You need to put an electric light and a thermostat inside the smaller box. The thermostat measures the air temperature and it turns the light on and off to keep the air in the box at about thirty-two degrees centigrade. You make the floor of the incubator from a piece of chicken wire . It is raised from the bottom of the box high enough to put a pan of water under it. Water keeps the air in the box wet.

That's how to build the incubator. To use it, just take the eggs from the mother hen. Place them on the chicken wire inside the box. Be sure there is water in the pan under the eggs. Then turn on the light and the thermostat to keep the air at a steady temperature. Every few hours turn the eggs gently. Try to keep the more pointed ends of the eggs facing down.

In the Philippines, egg incubators take about eighteen days to produce chickens.

**Shahriyar, the King of Persia, did not like women.**

His first queen had deceived him badly, and he was consequently determined that no woman would ever deceive him again. To make sure of this, he took a new queen every evening – and had her executed in the morning.

The turn came of the beautiful Shahrezad, who did not however intend to die so easily. She was also determined to put an end to the king's savage practices. Consequently, she arranged for her younger sister to come to the palace early, to ask a favour from Shahriyar. The favour was simple enough : Shahrezad was a skilled teller of tales, and her sister would ask to hear one more story before the executioner did his work.

The king listened with amusement to Shahrezad's sister's request and then to the tale itself, which slowly, however, began to gain his attention. It was still unfinished when the time of execution arrived, and this made the king angry, because he wanted to hear the end of this intriguing tale and to watch the execution. He could not, however, have both.

Shahriyar chose to hear the end of the story, but the matter was not quite as simple as he expected. As soon as she finished her first story, Queen Shahrezad began a second tale that grew quite naturally out of the first. The king found this continuation just as interesting as the earlier story had been, and listened on and on. One story became another, one day became another, and the executioner remained without any work to do.

*Read and translate the passage from "The hidden face..." to "...of weightlessness."*

The hidden face of the moon has so long been a mystery that the first successful attempt to reveal it will probably go down in history as one of the most important steps man has made to increase his knowledge of outer space.

What the voyage of Columbus was to the world in the fifteenth century, the journey of the rocket, Lunik III, might well be to the twentieth.

Lunik III was shaped like a top and weighed about 614 pounds. It travelled from the earth to the south side of the moon and continued its journey for some 4000 miles beyond the other side before the moon's attraction caused it to alter its path, making it turn round. When this occurred, the rocket was in a direct line between the sun and the moon and a great number of things happened. At the signal from the earth, the rocket stopped spinning and a cover opened at its nose. Two cameras appeared, one of which magnified the moon two and a half times more than the other. The film that was used to take the pictures has special markings on it so that the photographing of the moon's far side could be controlled from the earth. When the pictures had been taken, they were developed automatically by a special device designed to work under conditions of weightlessness. Now it was time for the rocket to move again, and another signal from the earth caused it to spin once more, for there was danger that if it remained still, its underside would freeze and its topside become too hot and so damage the delicate instruments within. The rocket then continued its journey round the moon, swung back to the earth and began to send the photographs that had been taken, by means of the special television-camera which translated the lines on the picture into radio signals. In this way, the hidden face of the moon became familiar to everybody. Those few who had expected to hear of strange beasts or lost civilization may have been disappointed but

or most people, the photographs solved an age-old mystery and provided the first really exciting glimpse of outer space.

Poachers have struck again at the Mountain Gorilla, one of the world's rarest animals. The gorillas - fewer than 250 - live in scattered family groups throughout the forest on the slopes of three extinct volcanoes. Each group is normally led by a dominant male who may weigh up to 130 kilos and is easily recognised by the stripe of silver fur which appears when he is fully mature. The poachers speared the male to death as he tried to defend his family and then made off with a baby gorilla whose mother is missing and also presumed dead.

With so few gorillas left, even one death is a serious blow, specially when a silverbacked male is lost. With no dominant to lead them, the rest of the group will probably split up and join other groups. Twenty-five years ago there were perhaps 500 gorillas in these high mountain forests. Today their numbers have been halved, not just by poaching but by human interference in all its forms. Illegal wood cutting, cattle-grazing and farming have reduced the park to a small strip.

The Government is now trying to protect the gorillas to ensure their survival. One of the most successful operations has been to habituate a group of wild gorillas to the presence of tourists, who are prepared to pay handsomely and to endure considerable hardship, crawling through dense undergrowth for a glimpse of these, our closest living relatives.

**Computer systems history**

The early history of the development of computing machines is replete with impressive names. The French scientist Blaise Pascal

is credited with the invention of the first adding machine in 1642. His machine was mechanical in nature, using gears to store numbers.

The mechanical model was followed up in 1822 by Charles Babbage, professor of mathematics at Cambridge University in England. Babbage used gears and punched cards to produce the first general purpose digital computer, which he called the analytic engine, but it was never completed or put into use.

Census taking provided the incentive for Herman Hollerith to use punched cards in the first data processing operation. Their successful application to the 1890 U.S. National Census demonstrated the value to be realized from automatic data processing systems. The laborious, time-consuming task of sorting census data by hand was reduced in both time required and effort expended, because punched cards were put into the machine which automatically sorted them.

Howard Aiken of Harvard University combined the mechanical processes of Babbage with the punched-cards techniques of Hollerith to develop an electromechanical computer. The Harvard Mark I, as it was called, was capable of multiplying and dividing at rates significantly faster than previously possible. The electromechanical nature of the device, which used punched cards and punched tape for data and control, limited its speed and capability.

#### Cậu bé có ý kiến hay nhất

Rất lâu rồi, có một người dân ông và một con voi đến một làng n. Đây là lần đầu tiên dân làng nhìn thấy voi, họ muốn biết trọng lượng của nó. Nhưng mỗi người một ý kiến khác nhau. Họ nói rằng ý kiến của họ đúng và của người khác là sai. Họ cố gắng nghĩ ra một phương pháp để có thể biết được con voi này nặng bao nhiêu. Nhưng họ không thể nghĩ ra một cách nào cả. Khi đó một cậu bé nói " cháu có một cách và cháu có thể nói cho các bác biết con voi nặng bao nhiêu, hãy để cháu thử xem". Dân làng không muốn nghe heo cậu bé, họ nói " Làm sao nó có thể làm được khi chúng tôi những người già còn không tìm được ra cách gì?" Nhưng họ vẫn quyết định để cho cậu bé thử.

Vài năm trở lại đây quan hệ giữa Việt Nam và các nước thành viên của Hiệp Hội các Quốc gia Đông nam châu Á (ASEAN) đã được cải thiện đáng kể (các thành viên của ASEAN là Brunei, Indonesia, Malaysia, Philipin, Singapore, và Thái Lan). Thủ tướng Võ Văn Kiệt đã đến thăm 6 nước này và Tổng bí thư Đỗ Mười cũng đã đi thăm Singapore và Thái Lan. Trong một vài tháng qua nguyên thủ của nhiều nước ASEAN đã nhận lời mời đến Việt Nam trong các cuộc viếng thăm thiện chí, để thảo luận về công việc của chính phủ và ký kết các hiệp định quan trọng, bao gồm một số hợp đồng liên doanh lớn. Ông Tổng thư ký ASEAN Ajit Singh đã đến Hà Nội vào cuối tháng 2 để bàn bạc với Bộ trưởng Ngoại giao Nguyễn Mạnh Cầm nhằm ấn định thời gian phù hợp cho Việt nam trở thành thành viên chính thức của ASEAN. Hiện nay Việt nam đóng vai trò là quan sát viên của ASEAN, vai trò này đã cho phép Việt nam có mặt tại các hội nghị Bộ trưởng khối ASEAN trong 2 năm qua. Các Bộ trưởng của khối ASEAN có thể sẽ xem xét việc kết nạp Việt Nam trong cuộc họp về an ninh khu vực vào tháng 7 tới.

Vài năm qua, Trung tâm nông nghiệp nhiệt đới Quốc tế ở Cali Colombia đã nghiên cứu giúp đỡ các chủ điền trang nhỏ. Trung tâm này gọi tắt là CIAS đã đào tạo 58 người để góp phần phát triển ngành công nghiệp giống của địa phương ở vùng Trung và Nam Mỹ Ông Ario Garai là Giám đốc công ty giống thuộc CIAS. Ông cho biết các nhà khoa học đã tạo ra được các giống cải tiến phù hợp với nông dân ở các nước đang phát triển. Nhưng ông cũng nói những nông dân nghèo khó có thể kiếm được giống này. Những công ty giống lớn cũng không thể cung cấp giống cho họ, do vậy họ phải trồng những giống mà cha ông họ vẫn trồng hoặc họ phải mua bất cứ giống gì họ có thể mua được tại thị trường ở địa phương. Họ thường không chắc là sẽ mua được loại giống gì ở đó. Các nhà nghiên cứu quyết định rằng họ sẽ đào tạo nông dân để cung cấp giống cho chính họ. Chương trình đào tạo này cần có nỗ lực hợp tác. Nó liên quan đến các chủ trang trại, các tổ chức phi chính phủ, và các tập đoàn quốc gia. Họ kiểm tra, chọn lựa và đưa ra thị trường giống của họ.

Họ lấy những giống tốt nhất trong chính mùa vụ của họ và cung cấp cho nông dân ở các vùng lân cận.

Ví dụ, 8 năm trước đây, có 23 điền chủ đã cùng tập hợp lại ở vùng miền Nam Colombia. Năm đầu tiên họ sản xuất được 8.000 kg giống cung cấp cho nông dân trong vùng và bây giờ họ cung cấp hơn 30.000 kg giống một năm. Ở Sutoludit - Quatemala mỗi năm nông dân ở đây trồng 36.000 kg hạt giống và họ lấy giống của một nhóm sản xuất giống gồm 42 điền chủ ở địa phương.

#### **Ngày lễ chơi khăm**

Gần đây tôi luôn ao ước là mình được ở nhà. Hôm nay là ngày 31/10 đó là ngày lễ chơi khăm ở Mỹ. Đây là ngày lễ tôi thích nhất trong năm, nhưng tôi lại phải nằm bệnh ở đây, cách thành phố New York của tôi 3 nghìn dặm. Tên tôi là Mark, tôi là sinh viên mỹ thuật ở Ý. Tôi đã sống và theo học ở đây gần một năm rồi. Tôi rất

hích ở Ý, nhưng hôm nay tôi cảm thấy rất nhớ nhà. Tôi rất nhớ hững trò nghịch ở nhà. Vào ngày lễ mọi người rất vui vẻ. Trẻ con thì mặc lễ phục khác nhau chúng kéo đến các nhà hàng xóm và chơi "chơi khăm hay là thết dãi", những người hàng xóm thường cho chúng kẹo, táo hay những đồng xu lẻ. Rất nhiều người lớn cũng rất thích mặc lễ phục. Họ thường mặc để đi dự tiệc.

Bóng đá là một trò chơi rất lâu đời. Người La Mã, Trung hoa, Aztec cổ đại đều chơi đá bóng. Đối với người La Mã thì đó là trò chơi chiến tranh mà hai đội lính có thể dùng bất kỳ sức mạnh nào để đá bóng về hai tuyến phòng vệ của nhau. Đế chế La Mã đã lâu không còn tồn tại nữa nhưng trò giải khuây thô bạo này của lính Aztec vẫn tiếp tục và có thể vẫn còn rất thô bạo. Thời Trung cổ, kiểu "bóng đá" này còn rất phổ biến ở Ý và Pháp, Anh và Scotland nhưng đó là trò nguy hiểm mà thậm chí các nhà vua đã phải cấm và hơn 300 năm nó không được chính thức công nhận. Nhưng năm 1613 vua James đệ lục của Scotland và đệ nhất của Anh đã tự cho phép mình thưởng thức trận đấu "Bóng đá và ca nhạc" ở một làng ở nước Anh và một vài năm sau, nhà độc tài người Anh Oliver Cromwell đã chơi bóng đá khi đang theo học ở một trường Đại học.

Gần đây tổ chức y tế Thế giới đã thông báo rằng bệnh đậu mùa hầu như đã được loại trừ ở hầu hết các nơi trên Thế giới, nhờ có việc tiêm phòng rộng rãi. Ai cũng được tiêm phòng ít nhất là một lần trong đời và nếu muốn đi từ nước này sang nước khác thì phải trình giấy chứng nhận đã tiêm phòng. Bằng cách này người ta đã ngăn chặn được sự lan truyền của bệnh, ngày nay chúng ta rất hiếm khi nghe đến bệnh này. Làm được điều này chủ yếu là do phát hiện lớn của Bác sĩ Edward Jenner - vào khoảng năm 1798 khi ông thực hiện một loạt thí nghiệm về phương pháp mới được gọi là "tiêm vaccin" (Vaccination) (Theo tiếng Latin "vacca" nghĩa là con bò). Ông Jenner phát hiện ra rằng những người làm việc với gia súc như người vắt sữa và người chăn bò thường bị nhiễm

một loại bệnh vô hại từ gia súc truyền sang nhưng họ không bao giờ bị bệnh đậu mùa. Do đó ông đã thí nghiệm bằng cách truyền đậu mùa của gia súc vào cánh tay qua những chỗ rạch của người khỏe mạnh, tay họ sẽ đau trong một, hai ngày vết rạch sẽ lành và không ai sẽ bị nhiễm bệnh nữa. Tin về sự phát hiện tuyệt vời này đã sớm lan truyền ra nước ngoài, mọi người đã đến bác sĩ để tiêm vacxin. Ở Mỹ, Gibraltar, Tây ban nha, Ai Cập và Trung quốc hàng ngàn người đã được tiêm chủng chỉ bằng một vết rạch đơn giản trên cánh tay và bệnh đậu mùa khủng khiếp đã bắt đầu biến mất.

Hai năm trước, lợn cỏ Việt Nam đã trở thành vật cảnh nuôi trong gia đình rất phổ biến ở Mỹ. Loài lợn này rất nhỏ. Một báo cáo cho biết một con lợn cỏ trưởng thành nặng không quá 2,7 kg, nó rất hiền và có thể nuôi được trong nhà. Rất nhiều người đã mua. Hiện nay trên toàn nước Mỹ có khoảng 20.000 con. Nhưng tờ báo World Trip giải thích rằng đó không phải là điều đơn giản.

Bà Aitomans sống ở bang Cansoveinia miền đông nước Mỹ. Hai năm trước, bà mua một con lợn của một công ty ở một bang miền Tây với giá là 1.200 USD. Khi mang về nhà nó chỉ nặng hơn 2 kg một chút. Bà chủ mới đã đặt tên cho con vật bé nhỏ này cái tên Amaly. Bà đã thả nó vào một cái cũi thường sử dụng cho trẻ em. Nhưng Amaly bắt đầu lớn phổng lên. Trong vòng chưa đầy một năm rưỡi, nó đã nặng 55 kg và không còn hiền lành nữa. Nó còn dám tấn công bà khi bà định tắm cho nó.

Nó chạy nhanh đến nỗi đã làm cho bà Aitomans bị ngã. Bây giờ Amaly đã nặng 79 kg. Bà Aitomans đã gọi điện đến công ty đã bán lợn cho bà để phản đối. Bà cũng phàn nàn về sự phổ biến của loài lợn này nhưng bà Aitomans không thể chia tay với Amaly vì nó cũng giống như thành viên trong gia đình vậy.

Thủ tướng Võ Văn Kiệt đã đi thăm Campuchia đầu tháng 4 để thảo luận với 2 đồng Thủ tướng - Hoàng thân Norodom Ranariddh

và ngài Hun-Sen về những vấn đề đôi bên cùng quan tâm. Những cuộc đàm phán này diễn ra sau chuyến viếng thăm Campuchia hồi tháng 2 của Bộ trưởng ngoại giao Việt nam. Trọng tâm của sự tranh chấp biên giới giữa hai nước là hiệp ước được ký kết năm 1980 và có giá trị trong vòng 20 năm. Hiệp ước này đề cập tới, ví dụ, sự hợp tác qua biên giới và mậu dịch quá cảnh, nhưng từ khi Việt nam rút quân đội đóng ở Campuchia về năm 1989, gần 10 năm sau khi hiệp ước này được ký, thì những bất đồng về biên giới cũng như sự thù địch chống Việt kiều ở Campuchia ngày càng gia tăng.

Bất cứ vật gì được sử dụng như tiền có thể được gọi là vật trao đổi. Nhưng để hiểu rõ hơn về tiền ở dạng vật trao đổi này, chúng ta nên đặt câu hỏi "nó được sử dụng vào mục đích gì?". Nếu chúng ta trả lời được câu hỏi này chúng ta sẽ thấy được chức năng và mục đích của vật trao đổi. Ngày nay, việc sử dụng tiền chủ yếu nhằm mục đích kinh tế. Có 4 chức năng kinh tế thường được đề cập tới ngay ở đầu những cuốn sách giáo khoa cơ bản về ngân hàng hay thương mại. Nhưng trước kia việc sử dụng tiền không giới hạn trong bốn chức năng kinh tế này. Có những chức năng tương đương quan trọng khác như xã hội, tôn giáo, ma thuật hay đơn giản là chức năng trang trí. Đôi khi chức năng kinh tế này được cụ thể hoá và hạn chế trong việc mua bán nô lệ hoặc trả tiền mua cô dâu. Chúng ta nên nhìn nhận những người này và các vật trao đổi của họ theo thực tế, chứ không nên dựa trên quan niệm về các chức năng kinh tế hiện đại của đồng tiền.

#### **Ngày chiến thắng**

Cuộc chiến tranh giữ nước vĩ đại đã kết thúc vào tháng 5 năm 1945. Ngày mồng 9 tháng 5 huy hoàng đó đã đi vào lịch sử của đất nước chúng tôi. Người ta kỷ niệm ngày này bằng các cuộc mít tinh và tuần hành, họ mang hoa đến các đài tưởng niệm nơi các anh hùng đã ngã xuống. Các cựu chiến binh thì kể cho các bạn trẻ về cuộc đấu tranh bảo vệ đất nước xã hội chủ nghĩa của họ.

Họ đã phải trả giá rất lớn mới đạt được thắng lợi này. Nhân dân Xô viết đã phải chiến đấu chống lại quân Phát xít từ Biển trắng ở miền Bắc đến Biển đen ở miền Nam. Họ đã bảo vệ Maxcova và Vôngagrát cũng như hàng ngàn các thành phố và làng mạc khác. Họ đã giúp nhân dân các nước thoát khỏi chủ nghĩa Phát xít. Dân tộc Xô viết anh hùng không những đã bảo vệ được tổ quốc của họ mà còn đã cứu cả Thế giới.

Suốt nửa đầu của thế kỷ 20, điện ảnh đã vượt hẳn lên trên tất cả các hình thức giải trí phổ biến khác trên Thế giới. Trong những ngày hoàng kim của rạp chiếu bóng hay xinê - người Mỹ và người Anh gọi chúng bằng các tên khác là rạp chiếu phim - hàng triệu người trên thế giới có thói quen đi xem phim ít nhất là một lần trong tuần. Đây cũng là thời kỳ hoàng kim của Hollywood - kinh đô điện ảnh của nước Mỹ và của cả thế giới.

Những bộ phim câm đầu tiên (tất nhiên là phim đen trắng) được chiếu trong những năm 1890 góp phần giải trí trong phòng nhạc cùng với các hoạt động sống động khác như ca múa, ảo thuật. Những phim như vậy chỉ đơn giản là làm cho khán giả sờn gai ốc. Cảnh một đoàn tàu đổ sập lao thẳng về phía bạn trước màn ảnh thường gây được hiệu quả mà cả nhà sản xuất phim và khán giả đều mong đợi. Dĩ nhiên yếu tố giật gân còn tiếp tục rất có ý nghĩa trong phim ảnh và điều này được thấy rõ qua nhu cầu xem những cảnh "giật gân" trong nhiều phim khoa học viễn tưởng.

Edinburgh là thủ đô của Scotland và là một trong những thành phố đẹp nhất của châu Âu. Nằm trên 7 quả đồi, Edinburgh thoai dân xuống biển. Ngọn đồi cao nhất là cao 300 mét so với mực nước biển. Từ đường phố trung tâm của thành phố bạn có thể thấy những con tàu đến Edinburgh từ các nước khác nhau trên thế giới. Trong những khu phố cổ, các đường phố chật hẹp. Những ngôi nhà cao với cửa sổ nhỏ có từ một nghìn năm trước được xây từ

chân đồi lên đến tận lâu đài Edinburgh. Phố mới nằm ở phía chân đồi. Phố xá ở đây thẳng tắp và được quy hoạch đẹp nên rất dễ đi dạo và ngắm cảnh trong thành phố Edinburgh. Người ta nói rằng chỉ có hai thành phố được quy hoạch đẹp nhất trên thế giới là Edinburgh và Leningrat.

Thời tiết là cái gì đó mà không ai có thể điều khiển được. Nó ảnh hưởng đến mọi người, giàu hay nghèo, trẻ hay già ở khắp nơi trên Thế giới. Đó có thể là lý do tại sao có nhiều câu thành ngữ nói về thời tiết, đặc biệt là về mưa. Đôi khi bạn cần có mưa thì bạn chẳng có giọt nào cả. Khi khác bạn không mong mưa thì mưa lại đến. Lấy ví dụ một trận bóng chày, một trận mưa bão bất thành đành làm cho trận đấu đang diễn ra sôi nổi phải dừng lại, các cầu thủ và hơn 20.000 khán giả đang xem phải chạy trú mưa. Nếu trận đấu không tiếp tục thì những người đã mua vé vào xem này nhận được những vé đặc biệt mà lần sau họ đi xem sẽ không phải mất tiền. "Rain check", bây giờ có nghĩa là một cơ hội thứ hai để làm việc gì đó. Thường thì "Rain check" không liên quan gì tới mưa cả. Các cửa hàng cũng có thể tạo ra cơ hội thứ hai cho khách hàng khi mà sản phẩm của họ bán hết với giá rẻ đặc biệt, ví dụ như 1 cái TV chẳng hạn. Sau khi mọi chiếc TV đã được bán hết, cửa hàng này sẽ phát "Rain check" cho những ai muốn mua sản phẩm của họ. Cơ hội thứ hai cho phép những người sau vẫn mua với giá rẻ khi mà cửa hàng nhận thêm được hàng từ nhà máy. Cơ hội thứ hai cũng được sử dụng trong các tình huống của cuộc sống hàng ngày. Đó là cách đồng ý nhận lời mời nhưng vào một dịp khác. Bạn được mời đến dự bữa cơm tối ở một gia đình người bạn nhưng bạn không thể, bạn nói "mình rất muốn đến dùng cơm tối với gia đình nhưng rất tiếc mình lại bận rồi, cho mình để khi khác nhé." Nói một cách khác bạn đang hỏi lại liệu bạn có thể tham dự bữa cơm tối vào một dịp khác không.

### *Exercise 14.*

Một cậu bé da đỏ chạy như bay ra khỏi một làng ở Mexico. Trên tay cậu là một giỏ cá. Chúng vừa được vớt lên khỏi hồ nước lạnh

một vài phút trước đây. Cách xa đó một chút có một người khác đang đợi để nhận giỏ cá từ tay cậu bé một nhòai này rồi chạy tiếp. Và cứ như vậy từ người này qua người khác cá tươi được đưa nhanh từ hồ đến bàn tiệc của ngài Montezuma, người trị vì vùng Aztecs.

Tốc độ là rất quan trọng trong việc vận chuyển cá và nhiều thực phẩm tươi khác. Thực phẩm dễ bị hư hỏng cần phải đưa ra chợ, đến các bàn ăn càng nhanh càng tốt. Nhưng ngày nay các xe tải, tàu hoả , tàu biển và máy bay có thể thay thế những người đưa thực phẩm đó.

Máy bay là cách vận chuyển thực phẩm nhanh nhất và đặc biệt rất hữu ích trong việc chuyên chở thực phẩm đến cho người và động vật mà không thể tới được bằng các phương tiện khác. Giả dụ như có trận lụt hay động đất, xe tải và tàu hoả không thể chạy đến đó được. Người ta có thể thả thức ăn từ trên máy bay xuống để cứu nạn nhân khỏi chết đói. Nhưng vận chuyển bằng đường hàng không rất tốn kém , vì vậy trong phạm vi một nước phần lớn các loại thực phẩm dễ bị hỏng, ôi thiu được vận chuyển bằng xe tải hay tàu hoả.

Mục đích của bất kỳ một hệ thống năng lượng mặt trời nào cũng là thu nhận năng lượng mặt trời và chuyển nó thành năng lượng nhiệt có ích. Hoạt động của hệ thống này phụ thuộc vào một vài yếu tố như nguồn năng lượng mặt trời sẵn có, nhiệt độ không khí xung quanh, đặc tính của dạng năng lượng cần phải chuyển hoá thành và đặc biệt là đặc tính nhiệt của bản thân hệ thống năng lượng mặt trời đó. Hệ thống thu nhận năng lượng mặt trời để đốt nóng hay làm lạnh thường được chia thành loại hệ thống động và hệ thống tĩnh. Các hệ thống tĩnh thu nhận và phân phối năng lượng mặt trời mà không cần sử dụng nguồn năng lượng phụ nào khác. Chúng phụ thuộc vào cấu trúc xây dựng và tính cảm nhiệt của vật liệu được dùng. Ngược lại, hệ thống động bao gồm các bộ phận hoan toàn không phụ thuộc vào cấu trúc xây dựng và thường đòi hỏi một nguồn năng lượng phụ để chuyển năng lượng mặt trời đã

thu được đến nơi sử dụng. Các hệ thống này dễ lắp đặt hơn với các cấu trúc xây dựng hiện có.

Vì thế cho nên khi chúng ta nghiên cứu một hệ sinh thái, chúng ta có thể phân tích các thành phần (tức cấu trúc của hệ sinh thái) và chúng ta có thể phân tích các quá trình của nó (tức chức năng của hệ sinh thái). Ngày nay khi tiếng Anh trở thành một ngôn ngữ chính trên thế giới, người ta có thể tưởng tượng được đó là một điều hết sức mới mẻ là vào thời Shakespeare, chỉ vài triệu người nói tiếng Anh, và tiếng Anh không được coi trọng ở những nước khác ở châu Âu và chưa bao giờ được biết đến ở những nước còn lại của thế giới.

Tiếng Anh đã trở thành một thứ tiếng Quốc tế vì nó được coi là tiếng mẹ đẻ bên ngoài nước Anh trên tất cả các lục địa trên Thế giới. Sự truyền bá tiếng Anh bắt đầu vào thế kỉ thứ 17, cùng với sự ra đời của các khu định cư đầu tiên ở Bắc Mỹ. Xét cho cùng, chính sự ra tăng dân số lớn ở Mỹ kèm theo sự di cư ồ ạt vào thế kỉ 19 và 20 đã đem lại cho tiếng Anh vị trí hiện nay trên thế giới.

### **Sự phát triển và tiến hoá**

Một hệ sinh thái luôn tồn tại ở dạng cân bằng. Nó có thể nuôi sống một số lượng nhất định các loài động thực vật khác nhau. Khi số lượng của một loài động tăng lên thì sẽ có một sự thay đổi trong hệ sinh thái. Sẽ không có đủ thức ăn và nước uống cho tất cả các loài động vật. Hậu quả là một số sẽ chết. Hệ thống này sẽ

trở về trạng thái cân bằng của nó. Hệ sinh thái tự điều hoà như là máy điều hoà nhiệt độ trong hệ thống sưởi.

Hệ sinh thái không ở trạng thái tĩnh – chúng luôn thay đổi. Động thực vật có thể thích nghi với những thay đổi trong môi trường tự nhiên. Có thể dự đoán được mọi sự thay đổi, ví dụ như khi một đám cháy phá huỷ hệ thực vật trong vùng, chắc chắn sẽ dẫn đến những sự thay đổi. Những cây cỏ, hoa lá đầu tiên sẽ mọc lại, côn trùng sẽ xuất hiện, gió sẽ phát tán hạt của các cây nhỏ. Những cây này sẽ mọc lên, cỏ sẽ mất đi và một khu rừng rậm sẽ hình thành. Một số cây không thể sống trong rừng rậm sẽ chết. Những cây khác sẽ phát triển và các loài muôn thú sẽ sống trong rừng.

London là thủ đô của Vương quốc Anh và là một trong những thành phố lớn nhất trên thế giới.

Khu cổ nhất của London được gọi là thành phố "City" nhỏ nhưng rất quan trọng. 2000 năm trước người ta đã xây dựng một thị trấn ở đây. Người ta đã sống và làm việc ở đó hàng trăm năm, nhưng bây giờ rất nhiều nhà cổ đã bị dỡ bỏ. Hàng nghìn người đã đến đây vào mỗi buổi sáng để làm việc trong các cơ quan lớn.

Về phía đông là một khu vực rộng lớn được gọi là "khu đông". Đây là khu nghèo nhất của London, nơi mà người da màu sinh sống. Những vịnh lớn ở dọc sông ở khu đông làm cho London trở thành một trong ba hải cảng lớn nhất trên thế giới

Về phía Tây là những cửa hàng, rạp hát của khu Tây, khu này rất nổi tiếng với những khách du lịch giàu có. Phố Oxford với các cửa hàng bách hoá lớn là phố rất thích hợp cho việc mua sắm. Ở khu Tây cũng có nhiều công viên đẹp. Công viên Hyde Park là công viên lớn nhất của London. Các viện của Quốc hội nằm dọc bờ sông Thames và quảng trường Quốc hội là một trong nhiều quảng trường ở London. Một số quảng trường nhỏ, còn một số khác rộng lớn và nhộn nhịp như là ở quảng trường Trafalgar.

Cây cối và động vật có tác động qua lại lẫn nhau. Động vật lấy thức ăn từ thực vật. Tương tự cây cối lại phụ thuộc vào động vật. Tất cả cây cối và động vật phải có bốn thành phần : Cacbon, nitơ, hydrô, và ôxy. Những nhân tố này kết hợp với nhau để tạo thành protein, chất béo, và hydrat cacbon ở động vật. Những chất này sẽ dùng để cấu thành nên các tế bào, mô cơ hoặc trở thành một nguồn năng lượng. Oxy được lấy từ không khí và nước. Nước cũng là một nguồn hydro cho động vật sống. Cacbon và nitơ có ở không khí, biêm, hoặc từ đất.

Giả một chiếc máy tính nhỏ chưa đầy 50 bảng, các chuyên gia dự tính chẳng bao lâu nữa tất cả các trường học, các công việc giao dịch buôn bán và hầu hết các gia đình ở các nước giàu sẽ dùng một loại máy tính nào đó. Máy tính đã tạo ra những tình cảm mạnh mẽ - người ta hoặc thích hoặc ghét nó.

Những người yêu thích máy tính thì nói về sự hữu ích của nó như thế nào trong kinh doanh giáo dục và trong gia đình, ngoài những trò chơi vi tính ra, bạn có thể tính toán, học ngoại ngữ, viết thư, điều khiển hệ thống sưởi trung tâm và thậm chí ở một số nơi bạn có thể mang chúng đi chợ. Họ nhận xét máy tính mang lại cho họ sự nghỉ ngơi nhiều hơn vì nhiều công việc được Rôbốt máy tính hoá đảm nhiệm.

Về nguồn gốc thì Ulysses là người anh hùng của Hy Lạp cổ đại nhưng Ulysses của Maclean là một con tàu.

Tiểu thuyết có tiêu đề HMS Ulysses nói về các thủy thủ, những chiến hạm và cuộc chiến tranh trong những điều kiện khắc nghiệt của Bắc Đại Tây Dương và Bắc Cực, tiểu thuyết này kết thúc không có hậu. Nếu bạn thích những kết thúc hậu thì cuốn tiểu thuyết này không phù hợp với bạn. Câu chuyện xảy ra trong cuộc Đại chiến thế giới lần thứ 2 và tập trung vào chiến hạm Ulysses, một chiến hạm trong số nhiều chiến hạm khác đã bảo vệ đường tiếp tế của quân đồng minh ở Bắc Đại Tây Dương. Câu chuyện đã lên án cuộc chiến tranh vô nghĩa, hao tổn, đã cướp đi sinh mạng của nhiều người tốt và đã phá huỷ nhiều tàu chiến mà chẳng phục vụ cho một lợi ích nào cả.

### **Abraham Lincoln (1809-1865)**

Sinh ra trong một trang trại, bố là một nông dân nghèo và cậu bé này đã phải làm việc vất vả trong nông trại nhỏ bé của họ. Cậu bé Abe bé nhỏ đã học tập ở trường chưa đầy 1 năm. Nhưng cậu đọc rất nhiều sách. Cậu nói "Những điều tôi muốn biết là ở trong sách".

Một hôm Abraham mua được 1 cuốn sách nói về luật pháp của nước Anh, hàng ngày nghiên cứu và niềm say mê đã trở dậy trong ông. Ông đã trở thành 1 luật gia. Cuộc đời của ông trở nên thú vị

và hữu ích. Ông biết ông có thể giúp đỡ mọi người như thế nào và cố gắng sử dụng luật pháp để bảo vệ họ.

Vào năm 1864, Lincoln được bầu vào Quốc hội. Ông nói rằng ông chống lại chế độ nô lệ và người nô lệ da đen ở Châu Mỹ phải được tự do. Ông đã nghĩ đến một đất nước tự do cho tất cả mọi người.

Lincoln đã được mọi người biết đến. Năm 1860, ông được bầu làm Tổng thống của Hợp chúng Quốc Hoa kỳ.

Ý tưởng của ông về tự do cho những nô lệ da đen có lợi cho những người giàu có ở miền công nghiệp phía Bắc, còn những chủ đồn điền ở miền Nam bóc lột những người nô lệ đó thì phản đối. Do vậy cuộc chiến tranh giữa miền Bắc và miền Nam xảy ra và miền Bắc đã thắng lợi.

Năm 1864, Abraham Lincoln lại được bầu làm Tổng thống nhưng kẻ thù của ông, những kẻ muốn bóc lột người da đen như trước không thể để Lincoln tiếp tục sự nghiệp của mình.

Một năm sau đó ông bị giết hại trong một rạp hát ở Washington. Những tư tưởng của Abraham Lincoln sống mãi trong sự nghiệp đấu tranh của tất cả các tầng lớp nhân dân tiến bộ ở Mỹ.

Cơ lẽ thiết bị điện quan trọng nhất được sử dụng ngày càng rộng rãi trong suốt 20 năm qua là máy rửa bát đĩa. Rửa bát đĩa bằng tay không chỉ là công việc mất thời gian (có thể là mất nhiều thời gian hơn là việc dùng bữa ăn) mà còn là một công việc hết sức tẻ nhạt, đặc biệt khi bạn sống độc thân và công việc này cũng làm hỏng tay bạn. Máy rửa bát đĩa có nhiều kích cỡ, kiểu dáng khác nhau để phù hợp với túi tiền của bạn, số người trong gia đình và cách bày trong nhà bếp của bạn.

Mặt khác nền kinh tế của vùng tây bắc phát triển phụ thuộc nhiều vào công nghiệp khai thác gỗ. Cây bị đốn chặt để sản xuất những sản phẩm gỗ và nhiều nhà máy đã phải tăng nhịp độ để

đáp ứng cho nền khai thác gỗ. Trong những năm gần đây 500 hecta rừng già bị đốn chặt, kể cả những cây sống đến 500 năm và có đường kính rộng đến 2 mét. Trong khi Bộ lâm nghiệp Mỹ đang vật lộn với vấn đề cứu được bao nhiêu rừng, thì việc khai thác gỗ vẫn tiếp diễn. Các cán bộ lâm nghiệp địa phương từ chối cho phép chặt phá rừng già để lấy gỗ. Cuộc đấu tranh vẫn tiếp diễn trên qui mô Quốc gia với nhiều người ủng hộ mạnh mẽ cho cả hai phía.

### **Các dịch vụ tài chính**

Các dịch vụ kinh doanh, bảo hiểm, tài chính, ngân hàng, và cho thuê bao chiếm khoảng 11% trong tổng sản lượng của kinh tế Vương quốc Anh. London có một thị trường bảo hiểm lớn nhất trên thế giới, và các ngân hàng của London chịu trách nhiệm cho khoảng 1/5 các khoản vay nợ ngân hàng Quốc tế. London là trung tâm buôn bán hàng hoá chính của thế giới và là một trung tâm đóng một vai trò ngày càng quan trọng cho các thị trường tài chính. Ngân hàng Anh đảm bảo cho sự vững chắc của hệ thống tài chính, thực thi chính sách tiền tệ làm dịch vụ tài chính đối với chính phủ và cung cấp những cơ sở vật chất cho hệ thống ngân hàng. Các ngân hàng riêng lẻ cung cấp các dịch vụ tài chính cho từng tư nhân và các công ty, đặc biệt là các dịch vụ mở tài khoản và cho vay. Những ngân hàng này cũng có dịch vụ cho vay tại nhĩ.

### **Cambridge**

Cambridge là một thành phố đại học lâu đời đứng thứ hai ở Vương quốc Anh sau Oxford. Cambridge nằm bên sông Cam và được lấy tên từ con sông này. Có 29 trường đại học ở Cambridge. Đa phần dân số của thành phố này là giáo viên và sinh viên. Tất cả các sinh viên phải sống ở Cambridge trong khi họ đang theo học ở đó. Trên các đường phố của Cambridge, bạn có thể nhìn thấy nhiều bạn trẻ mặc quần áo màu xanh sẫm hoặc màu đen và đội mũ vuông đen. Truyền thống này bắt nguồn từ xa xưa khi mà các

sinh viên phải mặc toàn đồ đen. Vào thời đó họ không được chơi đùa, ca hát hay nhảy múa và họ cũng không được đi câu cá.

Nhiều vĩ nhân đã từng học tập tại Cambridge như Cromwell, Newton, Byron, Darwin và nhiều người khác. Nhà khoa học vĩ đại người Nga I.P. Pavlov đã đến Cambridge để nhận bằng tiến sĩ danh dự. Các sinh viên đã tặng ông một con chó đồ chơi.

Trường Cambridge nổi tiếng trên toàn thế giới. Nhiều nhà khoa học nổi tiếng đã làm việc ở đó như : Rutherford, Kappitza và những người khác.

Tất nhiên bạn đã từng nghe đến tên tuổi của William Shakespeare. Ông là một trong những nhà văn vĩ đại nhất trên thế giới. Ông sinh ra ở Stratford on Avon, một thị trấn nhỏ của nước Anh. Trường Stratford vào thời đó là một trường khá nghiêm khắc. Học sinh phải có mặt ở trường lúc 6 giờ sáng vào mùa hè, còn mùa đông thì muộn hơn. Ngày học rất dài và chỉ những ngày nghỉ William Shakespeare mới có thể được nghỉ thật sự. Ông thường đi dạo trong rừng và bên bờ sông Avon. Nhưng điều thích thú nhất trong cuộc đời của William là các nhóm diễn viên thỉnh thoảng biểu diễn ở Stratford. Ông xem họ biểu diễn và nhận thấy rằng mình cũng muốn trở thành diễn viên. Năm 21 tuổi, ông đến London và trở thành diễn viên và sau này ông bắt đầu viết kịch. William Shakespeare quan sát cuộc sống mới và ông thể hiện trong tác phẩm của mình về cách nhìn nhận khác nhau của mọi người về cuộc sống mới đó. Cuộc sống đã tự mình hiện ra trong các vở kịch của ông. Cho đến nay, những nhân vật anh hùng của Shakespeare vẫn được dựng lên sân khấu. Chúng ta đến các nhà hát và rạp chiếu bóng để gặp lại những nhân vật chính trong các tác phẩm của ông.

Năm 1964, toàn thế giới đã kỷ niệm 400 năm ngày sinh của William Shakespeare. Một con tem đẹp của Liên xô trong năm đó chân dung ông và một số cảnh trong vở kịch Rô-mêo và Juliet.

Qua nhiều thế kỷ, các ngày lễ hội có những vị trí khác nhau, nhưng ngày lễ Giáng sinh, lễ Phục sinh và ngày hạ chí vẫn giữ

nguyên vị trí là những ngày lễ chính trong năm. Lễ Giáng sinh trùng với thời điểm tối nhất trong suốt mùa đông dài dằng dặc ở Phần lan, là ngày nghỉ trọng tâm giành cho các gia đình. Vào khoảng giữa trưa ngày lễ Giáng sinh, bản hiệp ước hoà bình Nô en được phát đi trên khắp đất nước Phần lan từ cố đô Turku. Nghi thức này dựa trên luật pháp của thời Trung cổ mặc dù đã mất đi gốc tích luật pháp của nó hàng thế kỷ nhưng nó vẫn tồn tại như một nghi thức "khởi đầu " cho mùa giáng sinh. Tám hơi vào lễ Nô en là đặc trưng của đêm Nô en. Vào lúc chạng vạng tối, họ thắp nến lên trên những phần mộ của người trong gia đình. Rồi sau đó các gia đình tập trung lại cùng ăn bữa cơm Nô en chính. Cao điểm của đêm Nô en là sự viếng thăm của ông già Nô en , người trực tiếp mang quà Nô-en đến tặng. Nến và các vật trang trí Nô-en truyền thống được làm từ rơm để giữ không khí truyền thống của ngày lễ giáng sinh.

Một tổ chức ở Philipin đã chế tạo ra một thiết bị nuôi gà nhanh và dễ hơn . Tổ chức này là "Học viện công nghiệp quy mô nhỏ" đó là trung tâm nghiên cứu và đào tạo của trường đại học tổng hợp Philipin . Thiết bị lò ấp trứng này giữ trứng gà luôn ấm và an toàn trong khi gà con đang phát triển bên trong . Làm lò ấp trứng gà rất dễ, sử dụng nguyên vật liệu ở địa phương. Đây là cách làm : đầu tiên tìm hai hộp làm bằng bìa cát tông , một hộp dài khoảng nửa mét , rộng gần nửa mét , cao khoảng 30 cm ; hộp kia dạng như vậy nhưng các chiều nhỏ hơn một chút bạn có thể lồng hai hộp vào nhau và để các khoảng trống xung quanh . Tiếp theo bạn tìm báo cũ , vo tròn lại và đặt ở dưới đáy hộp lớn , dày khoảng 5 cm. Sau đó , đặt hộp nhỏ lên trên các nắm giấy , sao cho hộp nhỏ nằm chính giữa hộp lớn bên trên các nắm giấy. Vo thêm giấy và nhét vào bên ngoài hộp nhỏ, giấy này nằm ở giữa hộp to và hộp nhỏ . Bạn có thể dùng một số thanh gỗ để làm cho hộp chắc chắn. Sau đó làm một cái nắp bằng bìa cát tông sao cho thật khít với hộp to. Tiếp đó là bỏ một bóng điện và một bộ phận tự điều hoà

nhiệt vào trong hộp nhỏ . Bộ phận tự điều hoà nhiệt này sẽ đo nhiệt độ không khí và tắt , bật điện để giữ nhiệt độ trong hộp ở mức 32 độ C. Làm đáy của lò ấp trứng bằng một mảnh lưới đủ cao để có thể đặt một cho nước phía dưới, nước sẽ giữ độ ẩm không khí trong hộp .

Shahriyar ÷ Quốcvươngvùng Ba tư, rất ghét phụ nữ. Hoàng hậu đầu tiên đã lừa dối ông và kết quả là ông quyết định sẽ không để 1 phụ nữ nào có thể lừa dối ông 1 lần nữa. Ông ngủ với mỗi hoàng hậu mới một tối và sáng hôm sau thì hành quyết ngay. Lần này đến lượt nàng Shahrezad xinh đẹp, nàng không muốn bị chết 1 cách dễ dàng như vậy. Nàng quyết định xoá bỏ tục lệ độc ác của ông vua này. Shahrezad là một người kể chuyện rất giỏi, bởi vậy nàng đã thu xếp cho em gái của mình vào cung điện vào lúc sáng sớm để xin vua một sự chiếu cố đơn giản. Em gái nàng sẽ yêu cầu được nghe một câu chuyện trước khi đao phủ hành quyết. Nhà vua nghe thấy yêu cầu của cô em gái thì lấy làm thích thú. Và câu chuyện đã bắt đầu gây được sự chú ý của nhà vua. Khi đã đến giờ hành quyết mà câu chuyện vẫn chưa kết thúc, điều này khiến nhà vua rất tức giận vì ông vừa muốn nghe đoạn kết của câu chuyện vừa muốn xem lễ hành quyết. Tuy nhiên nhà vua không thể thực hiện được cả hai.

Phần che khuất của mặt trăng là một điều bí ẩn có từ xa xưa đến nỗi sự thành công đầu tiên trong việc khám phá ra nó, chắc chắn sẽ đi vào lịch sử như một trong những bước tiến quan trọng nhất, mà con người đã làm được để nâng cao tầm hiểu biết của mình về vũ trụ.

Chuyến đi biển của Côlômbô thế kỷ XV quan trọng như thế nào với thế giới thì chuyến du hành của tên lừa Lunik III cũng có thể có ý nghĩa như vậy ở thế kỷ XX này.

Tàu Lunik III trông như hình con quay, nặng khoảng 614 bảng. Nó xuất phát từ trái đất bay đến phần phía nam của mặt trăng và tiếp tục hành trình khoảng 4000 dặm trên phần còn lại trước khi sức hút của mặt trăng làm cho nó thay đổi đường bay và quay đầu lại. Khi điều này xảy ra, tàu Lunik đã bay ở giữa mặt trời và mặt trăng theo một đường thẳng và lúc này đã có rất nhiều điều xảy ra. Nhận được tín hiệu từ trái đất tàu ngừng quay tròn và nắp ở đầu được mở ra, hai ca-mê-ra xuất hiện, một chiếc phóng to mặt trăng gấp lên hai lần rưỡi chiếc kia. Phim được sử dụng để chụp ảnh ở đây là loại phim đặc biệt để việc chụp ảnh phần tối của mặt trăng có thể điều khiển được từ trái đất. Khi các bức ảnh được chụp chúng sẽ được tự động tráng bằng một thiết bị đặc biệt, được thiết kế để làm việc trong điều kiện không trọng lượng.

Những kẻ săn thú một lần nữa lại tấn công vào những con vượn núi, một trong những loài thú hiếm nhất của thế giới. Loài vượn này, chưa đến 250 con, sống thành từng bầy rải rác trong rừng trên những sườn dốc của 3 ngọn núi lửa đã tắt. Mỗi bầy thường có con đầu đàn là con đực cân nặng tới 130 kg và dễ dàng nhận ra nó bởi bộ lông có sọc màu sáng bạc xuất hiện khi con thú đã hoàn toàn trưởng thành. Những kẻ săn thú đâm con đầu đàn đến chết khi nó cố gắng bảo vệ gia đình mình, sau đó bắt đi chú vượn con khi mẹ nó bị mất tích và có thể cũng đã chết. Với quá ít số vượn còn sót lại, thì thậm chí 1 con vượn bị giết chết cũng thật sự là một thiệt hại lớn, đặc biệt là khi con đực đầu đàn có lưng màu sáng bạc bị chết. Không có con đực đầu đàn, rất có thể bầy vượn sẽ tan rã và nhập vào các bầy khác. Hai năm năm trước đây chỉ có khoảng 500 con vượn trong những khu rừng trên vùng núi cao này. Hiện thời số lượng này đã giảm xuống một nửa, không chỉ bị săn bắn trộm mà còn bị ảnh hưởng bởi sự can thiệp dưới đủ các hình thức khác của con người: đốn chặt gỗ trái phép, chăn nuôi gia súc và canh tác đã biến khu đất thành 1 dải đất hẹp. Chính phủ đang cố gắng bảo vệ loài vượn này và bảo đảm sự sống

còn của chúng. Một trong những việc thành công nhất của chính phủ là làm một nơi ở cho bảy vườn hoang dã để cho khách du lịch chiêm ngưỡng, những người này sẵn sàng trả một món tiền hào phóng và sẵn sàng chịu đựng bất kỳ gian khổ nào kể cả việc bò qua đường ngấm rậm rạp để có thể thoáng nhìn thấy những con vật này, người họ hàng gần gũi nhất hiện đang còn sống của chúng ta.

## **Lịch sử hệ thống máy vi tính**

Lịch sử về sự phát triển các máy vi tính vào những ngày đầu ghi những tên tuổi gây rất nhiều ấn tượng. Nhà khoa học người Pháp Blaise Pascal đã được công nhận với việc ông phát minh ra chiếc máy cộng đầu tiên vào năm 1642. Chiếc máy này về bản chất hoạt động theo nguyên lý cơ học và sử dụng hộp số để chứa các con số. Mô hình cơ học này vào năm 1822 được Charles Babbage sư toán học thuộc trường Cambridge ở Anh kế thừa. Babbage đã dùng hộp số và các tập bìa có đục lỗ để tạo ra chiếc máy vi tính có chữ số đa chức năng đầu tiên mà ông gọi là máy phân tích, nhưng chiếc máy đó chưa bao giờ được hoàn thiện hoặc đưa vào sử dụng. Việc tiến hành các khảo sát đã khích lệ Herman Hollerith cải tiến cách sử dụng các bìa có đục lỗ trong việc xử lý dữ liệu đầu tiên. Việc ứng dụng thành công của họ trong cuộc khảo sát toàn quốc ở Mỹ năm 1890 đã chứng thực giá trị có thể nhận thấy từ các hệ thống xử lý dữ liệu tự động. Việc phân loại dữ liệu khảo sát thủ công tỉ mỉ và tốn thời gian đã được giảm đi cả về thời gian lẫn công sức, vì các bìa có đục lỗ được đưa vào máy và được tự động phân loại dữ liệu. Harvard Aiken ở trường Harvard đã kết hợp các quá trình cơ học của Babbage với công nghệ dùng bìa đục lỗ của Hollerith để phát triển thành 1 chiếc máy vi tính kết hợp giữa điện tử và cơ khí. Máy tính Harvard Mark I như người ta thường gọi có thể nhân chia với một tốc độ nhanh hơn trước nhiều. Bản chất của chiếc máy tính điện tử cơ học sử dụng bìa và băng đục lỗ để xử lý dữ liệu và điều khiển đã hạn chế tốc độ và khả năng của nó.

Thanks for your letter. I'm sorry I haven't been able to write for a long time.

My test will be in two weeks, and I can't speak English well enough yet.

I'm very happy you want to come to England. Will you be able to come soon ?

I want to show you a lot of interesting places.

And I want you to meet all my English friends. I've made a lot of friends since I came here.

You'll have to speak English because none of them can speak French. It won't be too difficult for you, will it ?

You studied English at school, didn't you ? How long will you be able to stay ? I've been able to find a flat.

8. The address is at the top of the letter. Flats are difficult to find in England.
9. I'll be able to cook a good English dinner for you.
10. I had to get a flat because the hotel was too expensive for me.

2)

1. I got your postcard this afternoon.
2. I'm very pleased that you'll be able to come here next week.
3. Don't worry about accommodation. There's the Royal hotel just round the corner.
4. That's the hotel I used to stay before I met my landlady.
5. I'm sure you won't be bored here. This is an interesting town.
6. I go to college in the afternoons, so we'll be able to meet each other every evening.
7. Mr. John - he's the teacher who has been teaching me since I came here - says I should stay here longer.
8. I think that it's a good idea. What do you think ?
9. I still like this town and I'm happy here but I'm not satisfied with my English yet.
10. I miss everyone a lot. Write back to me soon.

3)

1. It was so nice to see you last week.
2. After you had gone I felt so lonely. I still do.
3. I really enjoyed seeing you again. I hope you enjoyed yourself too.
4. I took my exam three days ago. It was rather difficult.
5. If I pass I'll get a certificate.

6. I'll be able to find a good job.
7. I had a farewell class party last night. The atmosphere was great.
8. Everyone was in a good mood because they'd finished the course.
9. I'm going to miss all the new friends that I've made here.
10. I must stop now. See you next week.
11. I hope you'll be able to meet me at the airport.

4)

1. I've missed you a lot.
2. I've been sad this week because I haven't seen you for a month.
3. I've learnt a lot of French this week. I haven't been out much.
4. I had to do a lot of homework lastnight and I'm tired today.
5. Paris is smaller than London but it's more interesting.
6. I think it's the best city I've ever been to.
7. There is too much pollution and there aren't enough restaurants with English wine but I like it a lot.
8. All of my teachers are intelligent and none of them speak English to me, so I have to speak French.
9. Well, I have to finish now. I'll write again next week. I promise.

5)

1. Last Monday I went on an excursion to Cambridge.
2. I went with my class mates.
3. I got up early and met them at the school.
4. In the morning we visited the city. It was very interesting.
5. We had lunch in a restaurant and I drank some beer.

6. In the afternoon we sat in the park and walked through the park.
7. I met an interesting English man with blue eyes.
8. I didn't practise my English because he spoke French all the time.
9. Did you have a nice weekend ? I miss you much.

6)

1. Exactly two weeks ago, I purchased a shirt from your store in the Hight Street.
2. I had worn the shirt only twice when I was amazed to discover a hole in the left sleeve.
3. What is more, the shirt is not cheap. I believe in paying for quality.
4. I took the shirt back to the salesperson from whom I had bought it.
5. She refused to exchange it and refused to let me see the manager.
6. I'm writing to you in the hope of gaining satisfaction.
7. I enclose the shirt and the receipt which shows the price and the date on which it was purchased.
8. Thank you in advance.

7)

1. Please find enclosed the shirt about which you complained in your letter of March 13 th.
2. We regret that we can not exchange it.
3. Our manager, to whom you first complained, was correct in refusing to do so.

4. She was carrying out company policy, which states that goods which have been worn can not be exchanged.
5. Our quality control department investigated your complain and came to conclusion that the sleeve in which the hole appeared must have been subjected by unusual stress.
6. Perhaps you constantly rub your elbows on a rough surface.
7. Leather patches sewn to the elbows are on sale at the store, the one from which you bought the shirt.
8. I am sure the staff will be only ready to help you.

8)

1. Thank you for your letter of August 21st.
2. In which you complained about our laundry service.
3. May we remind you that the form on which you listed the items for laundering, states quite clearly that the hotel can not accept responsibility for lost items of clothing.
4. The bag in which you placed your clothes has the same warning clearly printed on it.
5. We apologize for the inconvenience.
6. We hope that we shall have the pleasure of your custom on future occasions.

9)

1. I am writing to enquire about some items of laundry which were lost in your hotel laundry service.
2. I was staying at the Victoria Hotel from March 3rd to March 27th.
3. On the morning of 5th, I handed in my laundry bag.

4. When it returned the next day, I discovered that two socks were missing.
5. I also discovered that a shirt, which had also been laundered, had lost all its buttons.
6. The house keeper to whom I complained told me that the items would be posted to me.
7. Until now I heard nothing.
8. I would also mention the question of compensation for the shirt, which was ruined.
9. I bought it for \$20 only a week previously.

10)

1. Well, this is my third week here. I like it very much.
2. I always get up at seven o'clock and have breakfast with my landlady.
3. English breakfast is rather small, but the tea is not bad.
4. I usually go to school by bus.
5. I often arrive at school at nine o'clock.
6. In the evening I always stay at home but sometimes I got to the cinema.
7. Life is very busy here.
8. Next weekend I am going on an excursion with class-mates.
9. Give my regards to the family.

11)

1. A recent advertisement in the TV Times magazine asked people to consider emigrating to Australia.

I would be very grateful if you could give me some information about this possibility.

Particularly information about the help you offer to pay the cost of the fare to Australia.

I would also like to know how one is able to become an Australian citizen, and how soon this could be achieved.

The advertisement also mentioned that "some constraints" might be placed on the emigration of large families.

I would be grateful if you could clarify precisely what is meant by "large families" in this context.

Thank you in advance.

)

I am terribly sorry that I failed to arrive in Athens last Friday.

I hope that this did not mess you up completely.

I know that you had already made some special arrangements for my visit with your parents and friends.

I am very sorry about all that.

I am sure you will be sympathetic.

When I tell you that my father is dangerously ill in a London hospital. I am very worried.

I found it impossible to leave England when he is in this state.  
8. See you later.

)

I thought, I'd drop you line to confirm the arrangements for my trip over to Germany.

I must say, I am really looking forward to it.

3. I should be leaving Heathrow Airport at 10 in the morning on the 27th.
4. The flight often arrives at half past eleven or thereabouts.
5. Could you meet me at the airport ?
6. I'd like to stay with you for 3 days, and then, on the 31st of May, I am going across the border to Koge in Denmark to see another old friend for a couple of days.
7. I'll be back with you on about the 3rd of June.
8. Then we can go off on our travels through Southern Germany.
9. I must be back in England on the 18th of June.
10. I hope these arrangements are OK with you.

14)

1. Thank you for your invitation to your wedding at the beginning of December.
2. I was pleased to learn that you and Frank have decided on "something" at last.
3. I'd like to be at the wedding very much especially a Dutch wedding.
4. But it is impossible for me to take that weekend off.
5. I have to work fairly late on Friday night.
6. Friends are coming down to stay from Sunday lunchtime.
7. So there would be no way in which I could squeeze a wedding in Holland in between.
8. So all I can do is to wish you the happiest of days and also a bright future.

5)

. I'm thinking about killing two birds with one stone.

. The stone is a three days trip to London from Friday 10th of March till the Monday.

The birds are seeing all those films.

I've wanted to see but can't in Chepstow and seeing you.

Would it be possible, Ali, to stay in your flat for that weekend?

With you - or, if you are away - without you - which would be a pity, but still convenient.

Of course, I'd like very much to see you.

And this seems a marvellous opportunity if you are going to be here.

Please could you let me know at once so that if it's not possible I could make other arrangements.

6)

Please help me, I have got a real problem.

I am in love with a girl whose name is Alice.

I met her through my study about 3 years ago.

Everyday, I try to meet her and tell her about my love for her but she doesn't accept it.

I know she doesn't love me but I don't want to live without her.

At the same time there is a girl whose name is Janey.

She loves me very much but I don't love her.

I think she is very nice but it is not love.

What should I do ? I think of both of them all the time.

I don't know what to do, please help me as soon as possible.

17)

1. How lovely to receive your letter.
2. Of all the Vietnamese students, who stayed with us, you are the first to write to us from Hanoi.
3. I'm delighted to hear the news of your marriage.
4. We are all well and I've been busy.
5. I've just returned from a lovely visit from Japan. It was a wonderful trip.

8. Give my love to all the girls and boys and tell them to write to me.
9. Who knows perhaps we may meet sometimes in the future.
10. Best wishes to you and every one.

18)

1. Thank you very much for your letter of 15th June.
2. I am sorry that my previous letter took so long to reach you.
3. I think this must have been due to the fact that it was sent by surface mail instead of airmail.
4. I am making sure that the present letter is posted to you by airmail.
5. You should get it within a week or so.
6. Yes, indeed, all is ready here to receive you as Visiting Professor.
7. We are looking forward to making you personal.

er I :

Dear Mary,

I've just heard from your parents that you have come to land and looking for a new job. While you are waiting, we think could be a good idea if you come down and see us for a few days longer. We've got a spare room. It hasn't begun to rain yet, so a luck, we will be able to visit a few places in the area, or even a walk to Dartmoor.

Vell, think about it, and we both hope you can come.

love,

liz and Peter.

*Letter 2 :*

Dear Joe,

I'm thinking about killing two birds with a stone. The "stone" is a three-day trip to Wales from Thursday 12th of January to Sunday. The "birds" are seeing all the beautiful places I have wanted to see but can't in Stoke Gabriel, and seeing you.

Would it be possible, Joe, to stay in your flat for that week with you - or, if you're away - without you - which would be a pity, but still convenient. Of course, I'd like very much to see you and this seems a marvelous opportunity if you are going to be there.

Please, could you let me know at once so that if it is not possible I could make another arrangement with Daisy.

I hope to see you .

Dear Mr. and Mrs. Hallinen,

I must write and thank you for your kindness to me personally on my visit to Wales this month. In fact, I can assure you those seven days were the happiest of my trip to Wales.

Yours sincerely,

John.

*Letter 9 :*

Dear sir,

I am afraid that I am forced to write to you about the collection of dustbins in Larch Grove. This morning, for the third time in three weeks, the council dustmen have left an appalling amount of

rubbish – paper, cans, ash and bottles – on the pavements of Larch  
rove. Surely, it is not impossible to collect rubbish without  
sweeping half of it over the streets. I would be most grateful if  
you would put an end to this matter immediately. We want clean  
houses, gardens, and streets in this town.

Yours faithfully,

Gerseoland Fox

*Letter 10 :*

Dear John,

I've missed you very much. I've been sad this week because I  
haven't seen you for a month. I've learnt a little French this week.  
Last night I had to study much because I am taking an exam next  
week. All of my teachers are kind and they help me very much,  
although it's still difficult for me to speak French fluently.  
Sometimes I go out with Jane, a new friend. She is also kind to  
me. I get used to French food and traffic. What are you doing now?  
Well, I really must finish now. I will write again in two days. Give  
my regards to your parents.

All my love,

Mary

*Letter 11:*

Dear Peter,

I'm sorry to disturb you by this letter. But in fact, I have a  
problem that only you can help me. Would you please meet Mary,  
one of my cousins at the Leeds airport on Friday 5th, June. Of  
course, you don't know her before so here is her description.

She is in her late thirties, she has fair complexion, thick brown  
hair which she wears in a bun and dark brown eyes. She is about  
1.5 metres tall.

And by the way, I send you a photograph of hers. I also tell her  
that you'll come to meet her.

I hope to receive the news from you.

Thanks a lot,

Mary.

*Letter 12:*

Dear Mr Bradburn,

I recently ordered from you a set of four French dining room chairs and an Italian coffee table. Both of which were advertised in the January edition of Home and Gardens magazine. They arrived as promised but unfortunately they were damaged. The coffee table had one of its legs broken and the backs of the chairs were scratched. I understand these items are under guarantee.

Could you please tell me what I should do ?

I look forward to hearing from you.

Yours sincerely,

Jane Robinson

*Letter 13:*

Dear John,

You must be very surprised to receive this letter. Do you remember me ? It is still in my mind that you and I met each other in the English Club last month. I've just heard from Mary that only you have the book "New Concept English".

I'd be very grateful if you could lend me this book. If I have this book in some days my entrance examination in next month will be less difficult. I'm sure that I only keep it in 3 days. Don't worry about it. I will take good care of it.

Please, let me know about this as soon as possible.

Yours sincerely,

Jane

*Letter 14:*

Dear Caroline,

I'm thinking about an incident that I can't forget. I write this letter and want to tell you about it.

You know it was on Tuesday morning when I was walking in a busy street. On this street I know the jewelery shop of Mr Taylor. At that time Mr Taylor was admiring a new window display and two of his assistants were working busily. The silence was broken when a large car roared down the arcade. One man stayed at a wheel while two others with black stocking over their faces jumped out and smashed the window of the shop with iron bars. Fortunately, those men were chased by passers by. I myself also saw one man escaping so I shouted at him. In a few minutes all of them were caught and taken to the police station.

Give my regards to your parents.

Love,

John

*Letter 15:*

Dear Sybil,

I'm terribly sorry that the book that I borrowed on Tuesday from you has some torn pages. I hope that you will forgive me for this. After reading the book I left it on a low table. Then my younger sister got hold of it. When I came into the room several pages were torn. Actually, I got angry with her. I'm very sorry about all that. I'm sure you'll be sympathetic, however, I have just bought another book and if it's possible I'll send it to you tomorrow.

Will you please forgive me ?

Thank you for your kindness.

Yours,

Jane.

## KEY

### Q 1 : The person I like most

Of all the people in the world, I like my dear mother the most. Not all the wealth in the world can make me hate my mother.

Everyone knows that that mother's love is the greatest love in the world. When I see how my mother behaves towards my father, brothers, sisters and me, I am filled with pride. In everything that she does, there is a touch of love. Even when she washes the dishes, she makes sure that they are clean so that no one in her family will become ill.

Though she sometimes scolds me, I know that she does so not because she is bad but because she is tired, working all day for the happiness of her family. So I keep quiet while she expresses her anger, so that she may feel a little relieved after that.

That she loves her family is proved every day. When my youngest brother is very hungry in the middle of the night and cries for milk, she wakes up at once to attend to him, even if she is tired or ill. In the same way, she wakes up before all the others and goes to bed last, so that everyone in the family can receive her care. If anyone is ill in the family, she is the one who is the most worried.

Such care and love no one in the world can give to me. For these reasons my mother will always remain the dearest person to me.

### Q 2 : The things I dislike the most

There are many things that I dislike ; but the ones I dislike the most are noise, crowds and laziness.

Noise disturbs me greatly. This is why I hate to live in a city. In a city, vehicles run to and fro dawn till midnight. This makes the city very noisy indeed. The voice of thousands of people living close to one another also add to the noises caused by the vehicles. Besides, there are noises in the factories in the city.

I also dislike crowds. Crowds make movement difficult. If a place is crowded, it is not easy to move about or to do any work quickly. If we are in a hurry to go anywhere, a crowd can delay our progress.

Finally, I hate laziness because a lazy boy is problem not only to his parents but also to others. By refusing to do any work, he compels others to work for him. Sometimes a weak and poor person has to work hard to bring food for a strong and healthy person who is lazy. Such a person is really bad and ill-mannered. As long as he gets what he needs and wants, he does not care what others think of him. I hate to see such a person, even if he is my own brother or father.

All this explains why I hate the things I have mentioned

### **Dề 3 : A frightful accident I have seen**

One evening I saw a car running at great speed. I knew at once that it would soon be involved in an accident.

As expected, the car had not gone very far when it went off the road and hit a tree. At once the car was on fire.

The driver was hurt so badly that he could not open the door of his car. Then I heard some frightful screams.

By now a big crowd had collected round the car ; but no one could help the unfortunate man in the car. It was dangerous to go too near to the burning car.

The fire grew bigger. There were no more screams. The driver was burnt to death. I felt very sad after that. Indeed I cannot forget that accident.

### **Dề 4 : A frightful dream**

One night, after a heavy meal, I went to bed late. It was hot and I felt very uneasy.

When at last I fell asleep, however, I had a very frightful dream. I saw a monster with long sharp teeth attack my village. It had a great appetite. It ate a number of the people it had killed.

It was indeed a terrible sight. There was blood all around, and the frightened villagers were running about in all directions, making a lot of noise.

At last the monster began to come towards me. I was so terrified that I gave out a loud scream.

I now woke up, and was greatly relieved to find that the danger was in was not real. It was just another of my wild dreams.

### **§ 5 : The usefulness of television**

Television enables us to see things in distant places. It is indeed one of the most wonderful things that man has ever invented.

Television not only entertains people but also teaches people a variety of important things. Through this wonderful invention we learn about people and events thousands of miles away. Pictures taken in all parts of the world are also shown on television for entertainment as well as for instruction. Short films based on popular stories are often shown which entertain millions of people all over the world.

In some countries television is used to teach pupils and students many useful lessons. Students who cannot go to school because of transport or other problems are taught all their lessons at home through television. As television appeals to the eye instead of the ear, people enjoy watching more than listening to the radio. Listening requires knowledge of many things, but what we see with our eyes explains itself.

### **§ 6 : The country I would like to visit**

I have heard and read a lot about the beautiful countries in the world. But the country that I would like to visit is the United States of America. From my geography books I know that the United States is a very big country. Here, there are people from all

countries of the world. Europeans, Africans, Asians and others live together in peace and happiness, like the people of Singapore and Malaysia. It would indeed be a pleasure to meet so many races of people in one country.

The building in the United States are among the largest in the world. The roads are the best in the world too. Travelling in this country is therefore very easy. There are fast-running cars, trains and other means of transport.

Again, the scenery is different in parts of the country. In some places there are high mountains. In some places there are lowlands for miles together. And in other parts, there are deserts.

Thus, travelling in this big country would be really very interesting. I should therefore welcome any opportunity to visit this country.

### **Đề 7 : The thing I enjoy doing**

I do many things every day, but the things I enjoy doing are plucking flowers and preparing my school lessons.

As a fourteen-year old girl, I help my mother every day. My mother is a very religious lady. Every evening, before her prayers, I go out in search of flowers which my mother needs for her prayers. I really enjoy looking for flowers around my house. I go to all our neighbour's gardens and pluck a variety of flowers. Our neighbours are very kind and they allow me to pluck as many flowers as I like.

Preparing my school lessons also gives me a lot of pleasure. As I prepare them, I learn many things about the world and its affairs, past and present. I also learn about the people around us as well as those across the oceans. Further, I learn more and more new words and phrases which help me to speak and write better. What I learn from books also helps me to meet and talk with people confidently.

Thus, the things that I like to do not only amuse my mind but so enrich my mind.

## **§ 8 : Living in a city**

A city is very noisy ; yet most people like to live in it. There are indeed many things to see and enjoy in a city.

The streets in a city are full of people and vehicles. Cars, buses and other vehicles can be seen running up and down the streets throughout the day. All these make a city very noisy and busy. Sometimes all kinds of accidents occur and some people die as a result.

In a city, there are also many schools and hospitals. So, the people here find it very easy to send their children to school and to visit the hospital quickly when necessary.

At night a city is full of colourful lights. They make the city beautiful. Some parts of the city are very crowded at this time, especially where the eating stalls or cinemas are.

Many people also attend school at night to improve themselves. Today there are night schools in almost every city.

For all these reasons, living in a city could be very exciting indeed.

## **§ 9 : Why do I want to learn English**

English is the most important language in the world today. A very large number of people understand and use English in all parts of the world. Indeed, English is a very useful language. If we know English we can go to any place or country we like. We shall not find it hard to make people understand what we wish to say.

English also helps us to learn all kinds of subjects. Hundreds of books are written in English every day in all countries to teach people many useful things. The English language has therefore helped to spread ideas and knowledge to all the corners of the world. There is no subject that cannot be learned in the English language.

As English is used so much everywhere in the world, it has helped to make the countries of the world become more friendly with one another. The leaders of the world use English to understand one another. The English language has therefore also helped to spread better understanding and friendship among countries of the world.

Lastly, a person who knows English is respected by people. It is for all these reasons that I want to learn English.

### ***Đề 10 : Why are examinations important ?***

Most pupils are afraid of examinations, but examinations are very important today. They are also very interesting.

Examinations are important because they compel pupils to learn. Without them most pupils would not learn. So they would know very little about the world. They would learn only those subjects in which they are interested and ignore the other subjects which are thought to be difficult subjects, though they are very important in the modern age.

Examinations also help us to have some ideas about a person's knowledge of certain subjects. For example, if a boy has passed the Primary Six Examinations, we can at once know how much knowledge he has of certain subjects. Accordingly, we can have some ideas of what kind of work he can do. This is why most employers want to know what examinations a person had passed before he is given some work.

Finally, examinations are interesting because we can test how much we ourselves know, while preparing for them. When we sit for an examination we enjoy answering what we know, though we feel sad if we are not successful in an examination.

### ***Đề 11 : My best friend***

I have many friends of several races, but my best friend is a Chinese boy whose name is Ah Chong.

Ah Chong is fourteen years old. He lives near my house. He is not only a clever boy but also a good boy.

Ah Chong's father is a carpenter. His mother looks after their small shop. They are very hardworking people. They are also very kind to me.

Ah Chong goes to school with me. We are in the same class. He sometimes helps me in my lessons. I sometimes help him to understand and learn a few difficult lessons, too.

After school, Ah Chong and I play some games. Sometimes we go out to catch some fish or birds which we really enjoy catching. We often return home very late after our hunting trips and our parents scold us severely. But Ah Chong and I are so interested in his kind of hunting that we cannot give it up.

Indeed, I enjoy Ah Chong's company very much.

## **ĐỀ 12 : My teacher**

The name of my teacher is Miss Lam. She is a very pleasant lady.

Miss Lam likes children very much. She herself has many brothers and sisters at home. Most of them are going to school and she helps them in their lessons.

What she does for her own brothers and sisters she also does for the children in the class-room. She does not get angry easily. If some pupils are slow to learn, she takes great trouble to explain all the lessons slowly so that all the pupils can understand the lessons well. Sometimes, she also brings certain things into the class-room to explain a lesson. For example, one day she brought a toy ape to explain what an ape was. This makes her lessons very interesting indeed.

Miss Lam, sometimes, also takes all her pupils out for a visit to some interesting places. She believes that children could learn a lot by travelling. Last year she took our whole class to Ha Noi where we visited many interesting places such as, the museum, the zoo and the famous temple of literature.

I am indeed very proud of my teacher, Miss Lam.

### ***Dè 13 : The importance of water***

Water kills thousands of people and destroys many acres of crops every year. But water also gives life to all living things in the world.

Without water life is unthinkable.. We must have water to grow our food, feed the birds and animals in our homes, grow forests and produce electricity. We use waterways to carry our goods of trade. Even the human body, which is seventy parts out of one hundred, water itself, cannot exist for long without water.

Ever since the earth began, large quantities of water have been used by living things. Yet for every drop water that is taken from one place, another drop is put back somewhere else. Nature has a very clever way of carrying water from cloud to land and sea and back to cloud. No water has ever been lost.

But nature does not put water where and when we need it. While some men are drowning, others in another part of the world are dying of thirst. Thus, people all over the world are trying to bring water to places where it is scarce, to control its flow in times of floods and to make greater use of it.

### ***Dè 14 : The pleasures of living in a village***

A village is a quiet place where the influence of the city is not felt much. It is indeed a very good place for rest and relaxation.

In a village people do not live very close to one another. Their houses are far apart. Each house therefore has a lot of space around it. So, almost every house is surrounded by flowers and fruit plants and vegetables. All these make the village look green and fresh. There are also tall trees everywhere which provide shade from the sun and keep the village cool.

Some villages are surrounded by paddy-fields or mountains. There are also many streams and rivers in most villages. All these add great beauty and variety to the village scene.

The people of the village are very simple in thought and behaviour. They are therefore very friendly and helpful. So, the

times of the city are almost unknown in the village. The people  
ere work together and live in peace. Whenever they celebrate a  
stival, they dance and sing together and the whole village is in  
good mood. Living among such friendly and simply people, in such  
quiet place, is indeed a real pleasure.

### **Bài đọc hiểu.**

People go to live in cities to find work. People go to the cities because there are schools and doctors for their children. Young people go to cities because they think life is exciting there. They can make more friends of their own age and live more freely. Some people go to the city because of trouble at home. They have no land and they have quarrelled with their family. For these reasons our cities are growing quickly. But city life is often difficult for these newcomers. There are more people looking for jobs than there are jobs. A place to live and things to eat cost more in a city. In a city people are strangers to each other and it is easy to be lonely. Cities attract thousands every year but many later wish they had not left their village.

Trả lời câu hỏi sau :

- a. What are the reasons that cause people to go to live in cities ?
- b. What problems do newcomers usually face living in cities ?

Dịch sang tiếng Việt từ "But city life" cho đến hết bài.

Hãy đọc đoạn văn sau đây. Dùng thông tin trong bài đọc để trả lời câu hỏi hoặc hoàn thiện những câu còn bỏ trống.

Ashenden got up and walked slowly to his hotel. It was a small steel, spotlessly clean and his bedroom had a nice view, though on a cold wet day it would have been miserable, in that warm and sunny weather it was grey and pleasing. There were tables in the hall and he sat down at one of these and ordered a bottle of beer. The landlady was curious to know why he had come to stay in that bad season and he was glad to satisfy her curiosity. He told her that he had recently recovered from an illness and had come to London to get his strength back. He was employed by the government and was taking the opportunity to improve his German. He asked her if she would recommend a teacher to him. The landlady was good - humoured and talkative, so that Ashenden felt pretty sure that she would repeat the information he gave her in the proper quarter.
